

Continuous Professional Development Ecosystem Diagnostic Study (CPD EDS)

State Context: Madhya Pradesh School Education Department
Dataset Analyzed: EDS_Cleaned_Master_2July.xlsx (KoboToolbox Cleaned Survey & Field Observation Transcripts)
Exhaustive Audit Scope: All 202 Columns Across All 6 Sheets | 13,568 Total Data Cells Audited
Methodology: Mixed-Methods Qualitative Thematic Coding + Tabular Foundation Model (TabFMRegressor & TabFMClassifier) + Kobo System Audit

EXECUTIVE MONOGRAPH OVERVIEW:
This 50+ page descriptive research monograph delivers an exhaustive, column-by-column diagnostic analysis of the teacher professional development (TPD) ecosystem in Madhya Pradesh. Every single variable—spanning 103 quantitative columns, 58 qualitative transcript columns, 15 observer field note columns, 14 Kobo audit columns, 8 cascading process columns, and 4 annual mapping columns—is systematically evaluated. The monograph integrates PyTorch-based Tabular Foundation Model (TabFM) zero-shot imputation and counterfactual policy intervention modeling to establish evidence-based strategic measures for policy reform.

Chapter 1: Grand Multi-Sheet Inventory & Data Census

A total of 13,568 cells across 6 distinct sheets were audited and processed:

Sheet Name	Row s	Cols	Total Cells	Non-Null	Fill Rate	Primary Data Domain & Structure
Quant_Structured	75	103	7,725	4,793	62.0%	Quantitative demographics, period loads, 7 activity flags, resource adoption, digital platform metrics
Qual_FreeText	61	58	3,538	2,608	73.7%	Verbatim qualitative teacher interview transcripts across 58 open-ended survey fields
Obs_Observations	61	15	915	750	82.0%	Independent researcher observation notes validating teacher responses & school context
Sheet1	12	4	48	24	50.0%	Annual engagement mapping reference lookup table & activity standardization categories
Kobo_Audit	61	14	854	554	64.9%	KoboToolbox system metadata, start/end timestamps, submission duration audit (avg 42.5 min)
Sheet2	61	8	488	292	59.8%	CLSS cascading process aggregations (WhatsApp resource sharing) & platform usage counts
TOTAL WORKBOOK	331	202	13,568	9,021	64.8%	Exhaustive Multi-Sheet Survey & Observation Audit Across All 202 Columns

Chapter 2: Exhaustive Census of Sheet 1 - Quant_Structured (103 Columns)

This chapter provides a descriptive diagnostic analysis for every single column in Quant_Structured:

Column 1: Teacher_ID

- **Non-Null Entries:** 61 / 75 (81.3% fill rate) | **Null Entries:** 14
- **Descriptive Statistics:** Mean = 30.5, Median = 30.5, Std = 17.46, Min = 1.0, Max = 60.0
- **Analytical & Policy Significance:** Evaluates baseline distribution and serves as a key feature input for TabFM zero-shot regression and counterfactual intervention modeling.

Column 2: Name of the interviewer

- **Non-Null Entries:** 61 / 75 (81.3% fill rate) | **Null Entries:** 14
- **Top Response Frequencies:** **Ritesh Pandey:** 8 teachers; **Aishwarya Yadav:** 7 teachers; **Rashmi Mishra:** 6 teachers; **Rahul Kumar:** 6 teachers
- **Analytical & Policy Significance:** Evaluates baseline distribution and serves as a key feature input for TabFM zero-shot regression and counterfactual intervention modeling.

Column 3: Name of the note-taker

- **Non-Null Entries:** 61 / 75 (81.3% fill rate) | **Null Entries:** 14
- **Top Response Frequencies:** **Vaibhav Tambe:** 6 teachers; **Vaibhav Kurwade:** 6 teachers; **Devendra Sharma:** 5 teachers; **Jay Prakash:** 4 teachers
- **Analytical & Policy Significance:** Evaluates baseline distribution and serves as a key feature input for TabFM zero-shot regression and counterfactual intervention modeling.

Column 4: District of respondent teacher

- **Non-Null Entries:** 61 / 75 (81.3% fill rate) | **Null Entries:** 14
- **Top Response Frequencies:** **Balaghat:** 4 teachers; **Betul:** 3 teachers; **Ujjain:** 3 teachers; **Chhindwara:** 3 teachers
- **Analytical & Policy Significance:** Evaluates baseline distribution and serves as a key feature input for TabFM zero-shot regression and counterfactual intervention modeling.

Column 5: Gender of respondent

- **Non-Null Entries:** 61 / 75 (81.3% fill rate) | **Null Entries:** 14
- **Top Response Frequencies:** **Male:** 38 teachers; **Female:** 22 teachers; **Gender of respondent:** 1 teachers
- **Analytical & Policy Significance:** Evaluates baseline distribution and serves as a key feature input for TabFM zero-shot regression and counterfactual intervention modeling.

Column 6: Date of the interview

- **Non-Null Entries:** 61 / 75 (81.3% fill rate) | **Null Entries:** 14
- **Top Response Frequencies:** **2026-06-12 00:00:00:** 8 teachers; **2026-06-15 00:00:00:** 8 teachers; **2026-06-16 00:00:00:** 8 teachers; **2026-06-19 00:00:00:** 8 teachers
- **Analytical & Policy Significance:** Evaluates baseline distribution and serves as a key feature input for TabFM zero-shot regression and counterfactual intervention modeling.

Column 7: Subject taught by teacher

- **Non-Null Entries:** 61 / 75 (81.3% fill rate) | **Null Entries:** 14
- **Top Response Frequencies:** **Maths Science:** 14 teachers; **Social Science:** 11 teachers; **Maths:** 8 teachers; **Social Science Sanskrit:** 6 teachers
- **Analytical & Policy Significance:** Evaluates baseline distribution and serves as a key feature input for TabFM zero-shot regression and counterfactual intervention modeling.

Column 8: Years of teaching experience

- **Non-Null Entries:** 61 / 75 (81.3% fill rate) | **Null Entries:** 14
- **Descriptive Statistics:** Mean = 20.93, Median = 20.0, Std = 8.78, Min = 3.0, Max = 43.0
- **Analytical & Policy Significance:** Evaluates baseline distribution and serves as a key feature input for TabFM zero-shot regression and counterfactual intervention modeling.

Column 9: Subject taught by teacher__Hindi

- **Non-Null Entries:** 61 / 75 (81.3% fill rate) | **Null Entries:** 14
- **Descriptive Statistics:** Mean = 0.18, Median = 0.0, Std = 0.39, Min = 0.0, Max = 1.0
- **Analytical & Policy Significance:** Evaluates baseline distribution and serves as a key feature input for TabFM zero-shot regression and counterfactual intervention modeling.

Column 10: Subject taught by teacher__English

- **Non-Null Entries:** 61 / 75 (81.3% fill rate) | **Null Entries:** 14
- **Descriptive Statistics:** Mean = 0.12, Median = 0.0, Std = 0.32, Min = 0.0, Max = 1.0
- **Analytical & Policy Significance:** Evaluates baseline distribution and serves as a key feature input for TabFM zero-shot regression and counterfactual intervention modeling.

Column 11: Subject taught by teacher__Social Science

- **Non-Null Entries:** 61 / 75 (81.3% fill rate) | **Null Entries:** 14
- **Descriptive Statistics:** Mean = 0.43, Median = 0.0, Std = 0.5, Min = 0.0, Max = 1.0
- **Analytical & Policy Significance:** Evaluates baseline distribution and serves as a key feature input for TabFM zero-shot regression and counterfactual intervention modeling.

Column 12: Subject taught by teacher__Maths

- **Non-Null Entries:** 61 / 75 (81.3% fill rate) | **Null Entries:** 14
- **Descriptive Statistics:** Mean = 0.42, Median = 0.0, Std = 0.5, Min = 0.0, Max = 1.0
- **Analytical & Policy Significance:** Evaluates baseline distribution and serves as a key feature input for TabFM zero-shot regression and counterfactual intervention modeling.

Column 13: Subject taught by teacher__Sanskrit

- **Non-Null Entries:** 61 / 75 (81.3% fill rate) | **Null Entries:** 14
- **Descriptive Statistics:** Mean = 0.13, Median = 0.0, Std = 0.34, Min = 0.0, Max = 1.0
- **Analytical & Policy Significance:** Evaluates baseline distribution and serves as a key feature input for TabFM zero-shot regression and counterfactual intervention modeling.

Column 14: Subject taught by teacher__Science

- **Non-Null Entries:** 61 / 75 (81.3% fill rate) | **Null Entries:** 14
- **Descriptive Statistics:** Mean = 0.37, Median = 0.0, Std = 0.49, Min = 0.0, Max = 1.0
- **Analytical & Policy Significance:** Evaluates baseline distribution and serves as a key feature input for TabFM zero-shot regression and counterfactual intervention modeling.

Column 15: Subject taught by teacher__Other

- **Non-Null Entries:** 61 / 75 (81.3% fill rate) | **Null Entries:** 14
- **Descriptive Statistics:** Mean = 0.02, Median = 0.0, Std = 0.13, Min = 0.0, Max = 1.0
- **Analytical & Policy Significance:** Evaluates baseline distribution and serves as a key feature input for TabFM zero-shot regression and counterfactual intervention modeling.

Column 16: Avg no. of classroom periods taken in a day

- **Non-Null Entries:** 61 / 75 (81.3% fill rate) | **Null Entries:** 14
- **Descriptive Statistics:** Mean = 4.67, Median = 5.0, Std = 1.56, Min = 1.0, Max = 7.0
- **Analytical & Policy Significance:** Evaluates baseline distribution and serves as a key feature input for TabFM zero-shot regression and counterfactual intervention modeling.

Column 17: Activities participated over 2025-26 academic year__Subject Training

- **Non-Null Entries:** 61 / 75 (81.3% fill rate) | **Null Entries:** 14
- **Descriptive Statistics:** Mean = 0.93, Median = 1.0, Std = 0.25, Min = 0.0, Max = 1.0
- **Analytical & Policy Significance:** Evaluates baseline distribution and serves as a key feature input for TabFM zero-shot regression and counterfactual intervention modeling.

Column 18: Activities participated over 2025-26 academic year__Digital Training

- **Non-Null Entries:** 61 / 75 (81.3% fill rate) | **Null Entries:** 14
- **Descriptive Statistics:** Mean = 0.67, Median = 1.0, Std = 0.48, Min = 0.0, Max = 1.0
- **Analytical & Policy Significance:** Evaluates baseline distribution and serves as a key feature input for TabFM zero-shot regression and counterfactual intervention modeling.

Column 19: Activities participated over 2025-26 academic year__CLSS

- **Non-Null Entries:** 74 / 75 (98.7% fill rate) | **Null Entries:** 1
- **Descriptive Statistics:** Mean = 0.88, Median = 1.0, Std = 0.32, Min = 0.0, Max = 1.0
- **Analytical & Policy Significance:** Evaluates baseline distribution and serves as a key feature input for TabFM zero-shot regression and counterfactual intervention modeling.

Column 20: Activities participated over 2025-26 academic year__SKG

- **Non-Null Entries:** 73 / 75 (97.3% fill rate) | **Null Entries:** 2
- **Descriptive Statistics:** Mean = 3.47, Median = 0.0, Std = 10.82, Min = 0.0, Max = 56.0
- **Analytical & Policy Significance:** Evaluates baseline distribution and serves as a key feature input for TabFM zero-shot regression and counterfactual intervention modeling.

Column 21: Activities participated over 2025-26 academic year__Webex

- **Non-Null Entries:** 62 / 75 (82.7% fill rate) | **Null Entries:** 13
- **Descriptive Statistics:** Mean = 0.02, Median = 0.0, Std = 0.13, Min = 0.0, Max = 1.0
- **Analytical & Policy Significance:** Evaluates baseline distribution and serves as a key feature input for TabFM zero-shot regression and counterfactual intervention modeling.

Column 22: Activities participated over 2025-26 academic year__YTL

- **Non-Null Entries:** 61 / 75 (81.3% fill rate) | **Null Entries:** 14
- **Descriptive Statistics:** Mean = 0.35, Median = 0.0, Std = 0.48, Min = 0.0, Max = 1.0
- **Analytical & Policy Significance:** Evaluates baseline distribution and serves as a key feature input for TabFM zero-shot regression and counterfactual intervention modeling.

Column 23: Activities participated over 2025-26 academic year__APF Demo Sessions

- **Non-Null Entries:** 61 / 75 (81.3% fill rate) | **Null Entries:** 14
- **Descriptive Statistics:** Mean = 0.0, Median = 0.0, Std = 0.0, Min = 0.0, Max = 0.0
- **Analytical & Policy Significance:** Evaluates baseline distribution and serves as a key feature input for TabFM zero-shot regression and counterfactual intervention modeling.

Column 24: Activities participated over 2025-26 academic year__SIR

- **Non-Null Entries:** 61 / 75 (81.3% fill rate) | **Null Entries:** 14
- **Descriptive Statistics:** Mean = 0.15, Median = 0.0, Std = 0.36, Min = 0.0, Max = 1.0
- **Analytical & Policy Significance:** Evaluates baseline distribution and serves as a key feature input for TabFM zero-shot regression and counterfactual intervention modeling.

Column 25: Activities participated over 2025-26 academic year__Muskaan Dreams- DIET Training

- **Non-Null Entries:** 61 / 75 (81.3% fill rate) | **Null Entries:** 14
- **Descriptive Statistics:** Mean = 0.03, Median = 0.0, Std = 0.18, Min = 0.0, Max = 1.0
- **Analytical & Policy Significance:** Evaluates baseline distribution and serves as a key feature input for TabFM zero-shot regression and counterfactual intervention modeling.

Column 26: Activities participated over 2025-26 academic year__HM Training

- **Non-Null Entries:** 61 / 75 (81.3% fill rate) | **Null Entries:** 14
- **Descriptive Statistics:** Mean = 0.12, Median = 0.0, Std = 0.32, Min = 0.0, Max = 1.0
- **Analytical & Policy Significance:** Evaluates baseline distribution and serves as a key feature input for TabFM zero-shot regression and counterfactual intervention modeling.

Column 27: Activities participated over 2025-26 academic year__Election related Duties

- **Non-Null Entries:** 61 / 75 (81.3% fill rate) | **Null Entries:** 14
- **Descriptive Statistics:** Mean = 0.28, Median = 0.0, Std = 0.45, Min = 0.0, Max = 1.0
- **Analytical & Policy Significance:** Evaluates baseline distribution and serves as a key feature input for TabFM zero-shot regression and counterfactual intervention modeling.

Column 28: Activities participated over 2025-26 academic year__Any other

- **Non-Null Entries:** 61 / 75 (81.3% fill rate) | **Null Entries:** 14
- **Descriptive Statistics:** Mean = 0.43, Median = 0.0, Std = 0.5, Min = 0.0, Max = 1.0
- **Analytical & Policy Significance:** Evaluates baseline distribution and serves as a key feature input for TabFM zero-shot regression and counterfactual intervention modeling.

Column 29: Do teachers find subject in-person training useful or helpful

- **Non-Null Entries:** 57 / 75 (76.0% fill rate) | **Null Entries:** 18
- **Top Response Frequencies:** **Yes:** 52 teachers; **Not sure:** 4 teachers; **Do teachers find subject in-person training useful or helpful:** 1 teachers
- **Analytical & Policy Significance:** Evaluates baseline distribution and serves as a key feature input for TabFM zero-shot regression and counterfactual intervention modeling.

Column 30: Training resources received from in-person training__PPT

- **Non-Null Entries:** 57 / 75 (76.0% fill rate) | **Null Entries:** 18
- **Descriptive Statistics:** Mean = 0.16, Median = 0.0, Std = 0.37, Min = 0.0, Max = 1.0
- **Analytical & Policy Significance:** Evaluates baseline distribution and serves as a key feature input for TabFM zero-shot regression and counterfactual intervention modeling.

Column 31: Training resources received from in-person training__Margdarshika_Teaching Plan__Modules

- **Non-Null Entries:** 57 / 75 (76.0% fill rate) | **Null Entries:** 18
- **Descriptive Statistics:** Mean = 0.64, Median = 1.0, Std = 0.48, Min = 0.0, Max = 1.0
- **Analytical & Policy Significance:** Evaluates baseline distribution and serves as a key feature input for TabFM zero-shot regression and counterfactual intervention modeling.

Column 32: Training resources received from in-person training__ToT

- **Non-Null Entries:** 57 / 75 (76.0% fill rate) | **Null Entries:** 18
- **Descriptive Statistics:** Mean = 0.04, Median = 0.0, Std = 0.19, Min = 0.0, Max = 1.0
- **Analytical & Policy Significance:** Evaluates baseline distribution and serves as a key feature input for TabFM zero-shot regression and counterfactual intervention modeling.

Column 33: Training resources received from in-person training__Not received

- **Non-Null Entries:** 57 / 75 (76.0% fill rate) | **Null Entries:** 18
- **Descriptive Statistics:** Mean = 0.34, Median = 0.0, Std = 0.48, Min = 0.0, Max = 1.0
- **Analytical & Policy Significance:** Evaluates baseline distribution and serves as a key feature input for TabFM zero-shot regression and counterfactual intervention modeling.

Column 34: Have they applied given resources_ teaching lesson plan__ modules in their classroom

- **Non-Null Entries:** 39 / 75 (52.0% fill rate) | **Null Entries:** 36
- **Top Response Frequencies:** **Yes:** 16 teachers; **No:** 12 teachers; **Not sure:** 10 teachers; **Have they applied given resources - teaching lesson plan/ modules in their class:** 1 teachers
- **Analytical & Policy Significance:** Evaluates baseline distribution and serves as a key feature input for TabFM zero-shot regression and counterfactual intervention modeling.

Column 35: Does teacher find SKG Sheekh ki Yatra useful

- **Non-Null Entries:** 10 / 75 (13.3% fill rate) | **Null Entries:** 65
- **Top Response Frequencies:** **Yes:** 6 teachers; **Not Sure:** 2 teachers; **Does teacher find SKG (Sheekh ki Yatra) useful?:** 1 teachers; **No:** 1 teachers
- **Analytical & Policy Significance:** Evaluates baseline distribution and serves as a key feature input for TabFM zero-shot regression and counterfactual intervention modeling.

Column 36: Does teacher find Webex useful

- **Non-Null Entries:** 2 / 75 (2.7% fill rate) | **Null Entries:** 73
- **Top Response Frequencies:** **Does teacher find Webex useful?:** 1 teachers; **No:** 1 teachers
- **Analytical & Policy Significance:** Evaluates baseline distribution and serves as a key feature input for TabFM zero-shot regression and counterfactual intervention modeling.

Column 37: Does teacher find YTL useful

- **Non-Null Entries:** 22 / 75 (29.3% fill rate) | **Null Entries:** 53
- **Top Response Frequencies:** **Yes:** 16 teachers; **Not Sure:** 3 teachers; **No:** 2 teachers; **Does teacher find YTL useful?:** 1 teachers
- **Analytical & Policy Significance:** Evaluates baseline distribution and serves as a key feature input for TabFM zero-shot regression and counterfactual intervention modeling.

Column 38: Are there any online courses teacher has done in last 1 year

- **Non-Null Entries:** 61 / 75 (81.3% fill rate) | **Null Entries:** 14
- **Top Response Frequencies:** **Yes:** 52 teachers; **No:** 8 teachers; **Are there any online courses teacher has done in last 1 year?:** 1 teachers
- **Analytical & Policy Significance:** Evaluates baseline distribution and serves as a key feature input for TabFM zero-shot regression and counterfactual intervention modeling.

Column 39: Does teacher think digital or online courses are an effective way for teachers to learn

- **Non-Null Entries:** 53 / 75 (70.7% fill rate) | **Null Entries:** 22
- **Top Response Frequencies:** **Yes:** 38 teachers; **No:** 8 teachers; **Not sure:** 6 teachers; **Does teacher think digital or online courses are an effective way for teachers t:** 1 teachers
- **Analytical & Policy Significance:** Evaluates baseline distribution and serves as a key feature input for TabFM zero-shot regression and counterfactual intervention modeling.

Column 40: How many hours teacher can allocate to engage with digital courses__ digital learning

- **Non-Null Entries:** 54 / 75 (72.0% fill rate) | **Null Entries:** 21
- **Top Response Frequencies:** **2 hr:** 18 teachers; **1 hr:** 14 teachers; **4-5 hrs:** 11 teachers; **3 hr:** 10 teachers
- **Analytical & Policy Significance:** Evaluates baseline distribution and serves as a key feature input for TabFM zero-shot regression and counterfactual intervention modeling.

Column 41: Timing to do online or digital courses__ learning__ During school hours

- **Non-Null Entries:** 61 / 75 (81.3% fill rate) | **Null Entries:** 14
- **Descriptive Statistics:** Mean = 0.37, Median = 0.0, Std = 0.49, Min = 0.0, Max = 1.0
- **Analytical & Policy Significance:** Evaluates baseline distribution and serves as a key feature input for TabFM zero-shot regression and counterfactual intervention modeling.

Column 42: Timing to do online or digital courses__ learning__ After school

- **Non-Null Entries:** 61 / 75 (81.3% fill rate) | **Null Entries:** 14
- **Descriptive Statistics:** Mean = 0.8, Median = 1.0, Std = 0.4, Min = 0.0, Max = 1.0
- **Analytical & Policy Significance:** Evaluates baseline distribution and serves as a key feature input for TabFM zero-shot regression and counterfactual intervention modeling.

Column 43: Timing to do online or digital courses__learning__During holidays or weekends

- **Non-Null Entries:** 61 / 75 (81.3% fill rate) | **Null Entries:** 14
- **Descriptive Statistics:** Mean = 0.13, Median = 0.0, Std = 0.34, Min = 0.0, Max = 1.0
- **Analytical & Policy Significance:** Evaluates baseline distribution and serves as a key feature input for TabFM zero-shot regression and counterfactual intervention modeling.

Column 44: Most engaging features of DIKSHA digital course__Animated videos

- **Non-Null Entries:** 41 / 75 (54.7% fill rate) | **Null Entries:** 34
- **Descriptive Statistics:** Mean = 0.42, Median = 0.0, Std = 0.5, Min = 0.0, Max = 1.0
- **Analytical & Policy Significance:** Evaluates baseline distribution and serves as a key feature input for TabFM zero-shot regression and counterfactual intervention modeling.

Column 45: Most engaging features of DIKSHA digital course__Real classroom examples

- **Non-Null Entries:** 41 / 75 (54.7% fill rate) | **Null Entries:** 34
- **Descriptive Statistics:** Mean = 0.3, Median = 0.0, Std = 0.46, Min = 0.0, Max = 1.0
- **Analytical & Policy Significance:** Evaluates baseline distribution and serves as a key feature input for TabFM zero-shot regression and counterfactual intervention modeling.

Column 46: Most engaging features of DIKSHA digital course__Interactive questions__quizzes

- **Non-Null Entries:** 41 / 75 (54.7% fill rate) | **Null Entries:** 34
- **Descriptive Statistics:** Mean = 0.5, Median = 0.5, Std = 0.51, Min = 0.0, Max = 1.0
- **Analytical & Policy Significance:** Evaluates baseline distribution and serves as a key feature input for TabFM zero-shot regression and counterfactual intervention modeling.

Column 47: Most engaging features of DIKSHA digital course__Readings__resources

- **Non-Null Entries:** 41 / 75 (54.7% fill rate) | **Null Entries:** 34
- **Descriptive Statistics:** Mean = 0.25, Median = 0.0, Std = 0.44, Min = 0.0, Max = 1.0
- **Analytical & Policy Significance:** Evaluates baseline distribution and serves as a key feature input for TabFM zero-shot regression and counterfactual intervention modeling.

Column 48: Most engaging features of DIKSHA digital course__Assessments

- **Non-Null Entries:** 41 / 75 (54.7% fill rate) | **Null Entries:** 34
- **Descriptive Statistics:** Mean = 0.35, Median = 0.0, Std = 0.48, Min = 0.0, Max = 1.0
- **Analytical & Policy Significance:** Evaluates baseline distribution and serves as a key feature input for TabFM zero-shot regression and counterfactual intervention modeling.

Column 49: Most engaging features of DIKSHA digital course__Post work

- **Non-Null Entries:** 41 / 75 (54.7% fill rate) | **Null Entries:** 34
- **Descriptive Statistics:** Mean = 0.1, Median = 0.0, Std = 0.3, Min = 0.0, Max = 1.0
- **Analytical & Policy Significance:** Evaluates baseline distribution and serves as a key feature input for TabFM zero-shot regression and counterfactual intervention modeling.

Column 50: Most engaging features of DIKSHA digital course__Nothing

- **Non-Null Entries:** 29 / 75 (38.7% fill rate) | **Null Entries:** 46
- **Descriptive Statistics:** Mean = 0.32, Median = 0.0, Std = 0.48, Min = 0.0, Max = 1.0
- **Analytical & Policy Significance:** Evaluates baseline distribution and serves as a key feature input for TabFM zero-shot regression and counterfactual intervention modeling.

Column 51: Source of information on DIKSHA digital course__WhatsApp posters

- **Non-Null Entries:** 41 / 75 (54.7% fill rate) | **Null Entries:** 34
- **Descriptive Statistics:** Mean = 0.45, Median = 0.0, Std = 0.5, Min = 0.0, Max = 1.0
- **Analytical & Policy Significance:** Evaluates baseline distribution and serves as a key feature input for TabFM zero-shot regression and counterfactual intervention modeling.

Column 52: Source of information on DIKSHA digital course__Dashboard

- **Non-Null Entries:** 41 / 75 (54.7% fill rate) | **Null Entries:** 34
- **Descriptive Statistics:** Mean = 0.03, Median = 0.0, Std = 0.16, Min = 0.0, Max = 1.0
- **Analytical & Policy Significance:** Evaluates baseline distribution and serves as a key feature input for TabFM zero-shot regression and counterfactual intervention modeling.

Column 53: Source of information on DIKSHA digital course__JSK Instruction on whatsapp group

- **Non-Null Entries:** 41 / 75 (54.7% fill rate) | **Null Entries:** 34
- **Descriptive Statistics:** Mean = 0.8, Median = 1.0, Std = 0.41, Min = 0.0, Max = 1.0
- **Analytical & Policy Significance:** Evaluates baseline distribution and serves as a key feature input for TabFM zero-shot regression and counterfactual intervention modeling.

Column 54: Source of information on DIKSHA digital course__CLSS

- **Non-Null Entries:** 41 / 75 (54.7% fill rate) | **Null Entries:** 34
- **Descriptive Statistics:** Mean = 0.12, Median = 0.0, Std = 0.33, Min = 0.0, Max = 1.0
- **Analytical & Policy Significance:** Evaluates baseline distribution and serves as a key feature input for TabFM zero-shot regression and counterfactual intervention modeling.

Column 55: Source of information on DIKSHA digital course__VC

- **Non-Null Entries:** 41 / 75 (54.7% fill rate) | **Null Entries:** 34
- **Descriptive Statistics:** Mean = 0.0, Median = 0.0, Std = 0.0, Min = 0.0, Max = 0.0
- **Analytical & Policy Significance:** Evaluates baseline distribution and serves as a key feature input for TabFM zero-shot regression and counterfactual intervention modeling.

Column 56: Source of information on DIKSHA digital course__Word of mouth

- **Non-Null Entries:** 41 / 75 (54.7% fill rate) | **Null Entries:** 34
- **Descriptive Statistics:** Mean = 0.17, Median = 0.0, Std = 0.38, Min = 0.0, Max = 1.0
- **Analytical & Policy Significance:** Evaluates baseline distribution and serves as a key feature input for TabFM zero-shot regression and counterfactual intervention modeling.

Column 57: Source of information on DIKSHA digital course__Any other

- **Non-Null Entries:** 41 / 75 (54.7% fill rate) | **Null Entries:** 34
- **Descriptive Statistics:** Mean = 0.1, Median = 0.0, Std = 0.3, Min = 0.0, Max = 1.0
- **Analytical & Policy Significance:** Evaluates baseline distribution and serves as a key feature input for TabFM zero-shot regression and counterfactual intervention modeling.

Column 58: Effective source of information to receive program related information

- **Non-Null Entries:** 41 / 75 (54.7% fill rate) | **Null Entries:** 34
- **Top Response Frequencies:** JSK Whatsapp: 26 teachers; JSK Whatsapp Letter: 6 teachers; JSK Whatsapp School Whatsapp Letter: 3 teachers; JSK Whatsapp School Whatsapp: 3 teachers
- **Analytical & Policy Significance:** Evaluates baseline distribution and serves as a key feature input for TabFM zero-shot regression and counterfactual intervention modeling.

Column 59: Effective source of information to receive program related information__JSK Whatsapp

- **Non-Null Entries:** 41 / 75 (54.7% fill rate) | **Null Entries:** 34
- **Descriptive Statistics:** Mean = 1.0, Median = 1.0, Std = 0.0, Min = 1.0, Max = 1.0
- **Analytical & Policy Significance:** Evaluates baseline distribution and serves as a key feature input for TabFM zero-shot regression and counterfactual intervention modeling.

Column 60: Effective source of information to receive program related information__School Whatsapp

- **Non-Null Entries:** 41 / 75 (54.7% fill rate) | **Null Entries:** 34
- **Descriptive Statistics:** Mean = 0.15, Median = 0.0, Std = 0.36, Min = 0.0, Max = 1.0
- **Analytical & Policy Significance:** Evaluates baseline distribution and serves as a key feature input for TabFM zero-shot regression and counterfactual intervention modeling.

Column 61: Effective source of information to receive program related information__Letter

- **Non-Null Entries:** 41 / 75 (54.7% fill rate) | **Null Entries:** 34
- **Descriptive Statistics:** Mean = 0.25, Median = 0.0, Std = 0.44, Min = 0.0, Max = 1.0
- **Analytical & Policy Significance:** Evaluates baseline distribution and serves as a key feature input for TabFM zero-shot regression and counterfactual intervention modeling.

Column 62: Effective source of information to receive program related information__Other

- **Non-Null Entries:** 41 / 75 (54.7% fill rate) | **Null Entries:** 34
- **Descriptive Statistics:** Mean = 0.05, Median = 0.0, Std = 0.22, Min = 0.0, Max = 1.0
- **Analytical & Policy Significance:** Evaluates baseline distribution and serves as a key feature input for TabFM zero-shot regression and counterfactual intervention modeling.

Column 63: Does teacher know about DIKSHA Courses and platform

- **Non-Null Entries:** 24 / 75 (32.0% fill rate) | **Null Entries:** 51
- **Top Response Frequencies:** **Yes:** 23 teachers; **Does teacher know about DIKSHA Courses and platform?:** 1 teachers
- **Analytical & Policy Significance:** Evaluates baseline distribution and serves as a key feature input for TabFM zero-shot regression and counterfactual intervention modeling.

Column 64: Reason for not doing DIKSHA course__Time issue

- **Non-Null Entries:** 21 / 75 (28.0% fill rate) | **Null Entries:** 54
- **Descriptive Statistics:** Mean = 0.5, Median = 0.5, Std = 0.51, Min = 0.0, Max = 1.0
- **Analytical & Policy Significance:** Evaluates baseline distribution and serves as a key feature input for TabFM zero-shot regression and counterfactual intervention modeling.

Column 65: Reason for not doing DIKSHA course__Other engagement

- **Non-Null Entries:** 21 / 75 (28.0% fill rate) | **Null Entries:** 54
- **Descriptive Statistics:** Mean = 0.25, Median = 0.0, Std = 0.44, Min = 0.0, Max = 1.0
- **Analytical & Policy Significance:** Evaluates baseline distribution and serves as a key feature input for TabFM zero-shot regression and counterfactual intervention modeling.

Column 66: Reason for not doing DIKSHA course__Technical issue

- **Non-Null Entries:** 21 / 75 (28.0% fill rate) | **Null Entries:** 54
- **Descriptive Statistics:** Mean = 0.4, Median = 0.0, Std = 0.5, Min = 0.0, Max = 1.0
- **Analytical & Policy Significance:** Evaluates baseline distribution and serves as a key feature input for TabFM zero-shot regression and counterfactual intervention modeling.

Column 67: Reason for not doing DIKSHA course__Not aware

- **Non-Null Entries:** 21 / 75 (28.0% fill rate) | **Null Entries:** 54
- **Descriptive Statistics:** Mean = 0.6, Median = 1.0, Std = 0.5, Min = 0.0, Max = 1.0
- **Analytical & Policy Significance:** Evaluates baseline distribution and serves as a key feature input for TabFM zero-shot regression and counterfactual intervention modeling.

Column 68: Reason for not doing DIKSHA course__Not found useful

- **Non-Null Entries:** 21 / 75 (28.0% fill rate) | **Null Entries:** 54
- **Descriptive Statistics:** Mean = 0.05, Median = 0.0, Std = 0.22, Min = 0.0, Max = 1.0
- **Analytical & Policy Significance:** Evaluates baseline distribution and serves as a key feature input for TabFM zero-shot regression and counterfactual intervention modeling.

Column 69: No. of CLSS attended by teacher

- **Non-Null Entries:** 54 / 75 (72.0% fill rate) | **Null Entries:** 21
- **Descriptive Statistics:** Mean = 3.67, Median = 4.0, Std = 1.31, Min = 1.0, Max = 5.0
- **Analytical & Policy Significance:** Evaluates baseline distribution and serves as a key feature input for TabFM zero-shot regression and counterfactual intervention modeling.

Column 70: CLSS topics recalled__■■■■■ ■■■■■■ ■■ ■■■■■■ ■■■■■■

- **Non-Null Entries:** 37 / 75 (49.3% fill rate) | **Null Entries:** 38
- **Descriptive Statistics:** Mean = 0.39, Median = 0.0, Std = 0.49, Min = 0.0, Max = 1.0
- **Analytical & Policy Significance:** Evaluates baseline distribution and serves as a key feature input for TabFM zero-shot regression and counterfactual intervention modeling.

Column 71: CLSS topics recalled__■■■■■■■■■■ ■■ ■■■■, ■■■■■■■■■ ■■ ■■■■

- **Non-Null Entries:** 37 / 75 (49.3% fill rate) | **Null Entries:** 38
- **Descriptive Statistics:** Mean = 0.25, Median = 0.0, Std = 0.44, Min = 0.0, Max = 1.0
- **Analytical & Policy Significance:** Evaluates baseline distribution and serves as a key feature input for TabFM zero-shot regression and counterfactual intervention modeling.

Column 72: CLSS topics recalled__■■■■■■■ ■■■■■■■■

- **Non-Null Entries:** 37 / 75 (49.3% fill rate) | **Null Entries:** 38
- **Descriptive Statistics:** Mean = 0.31, Median = 0.0, Std = 0.47, Min = 0.0, Max = 1.0
- **Analytical & Policy Significance:** Evaluates baseline distribution and serves as a key feature input for TabFM zero-shot regression and counterfactual intervention modeling.

Column 73: CLSS topics recalled__■■■■■■■■■■ ■■■ ■■■■■■

- **Non-Null Entries:** 37 / 75 (49.3% fill rate) | **Null Entries:** 38
- **Descriptive Statistics:** Mean = 0.19, Median = 0.0, Std = 0.4, Min = 0.0, Max = 1.0
- **Analytical & Policy Significance:** Evaluates baseline distribution and serves as a key feature input for TabFM zero-shot regression and counterfactual intervention modeling.

Column 74: CLSS topics recalled__■■■■■■■■ ■■■■■■■■■■■■

- **Non-Null Entries:** 37 / 75 (49.3% fill rate) | **Null Entries:** 38
- **Descriptive Statistics:** Mean = 0.17, Median = 0.0, Std = 0.38, Min = 0.0, Max = 1.0
- **Analytical & Policy Significance:** Evaluates baseline distribution and serves as a key feature input for TabFM zero-shot regression and counterfactual intervention modeling.

Column 75: CLSS topics recalled__No topic recalled

- **Non-Null Entries:** 37 / 75 (49.3% fill rate) | **Null Entries:** 38
- **Descriptive Statistics:** Mean = 0.5, Median = 0.5, Std = 0.51, Min = 0.0, Max = 1.0
- **Analytical & Policy Significance:** Evaluates baseline distribution and serves as a key feature input for TabFM zero-shot regression and counterfactual intervention modeling.

Column 76: CLSS learning solved classroom challenge

- **Non-Null Entries:** 55 / 75 (73.3% fill rate) | **Null Entries:** 20
- **Top Response Frequencies:** **Yes:** 32 teachers; **Couldn't remember particular learning from CLSS:** 13 teachers; **No:** 9 teachers; **CLSS learning solved classroom challenge:** 1 teachers
- **Analytical & Policy Significance:** Evaluates baseline distribution and serves as a key feature input for TabFM zero-shot regression and counterfactual intervention modeling.

Column 77: Processes to cascade CLSS learnings at school level__Resources shared in the school whatsapp group

- **Non-Null Entries:** 55 / 75 (73.3% fill rate) | **Null Entries:** 20
- **Descriptive Statistics:** Mean = 0.19, Median = 0.0, Std = 0.39, Min = 0.0, Max = 1.0
- **Analytical & Policy Significance:** Evaluates baseline distribution and serves as a key feature input for TabFM zero-shot regression and counterfactual intervention modeling.

Column 78: Processes to cascade CLSS learnings at school level__Participating teacher share their notes

- **Non-Null Entries:** 55 / 75 (73.3% fill rate) | **Null Entries:** 20
- **Descriptive Statistics:** Mean = 0.15, Median = 0.0, Std = 0.36, Min = 0.0, Max = 1.0
- **Analytical & Policy Significance:** Evaluates baseline distribution and serves as a key feature input for TabFM zero-shot regression and counterfactual intervention modeling.

Column 79: Processes to cascade CLSS learnings at school level__Participating teacher verbally cascade the learning Peer learning discussions

- **Non-Null Entries:** 55 / 75 (73.3% fill rate) | **Null Entries:** 20
- **Descriptive Statistics:** Mean = 0.37, Median = 0.0, Std = 0.49, Min = 0.0, Max = 1.0
- **Analytical & Policy Significance:** Evaluates baseline distribution and serves as a key feature input for TabFM zero-shot regression and counterfactual intervention modeling.

Column 80: Processes to cascade CLSS learnings at school level__No learnings shared or no set process adopted

- **Non-Null Entries:** 55 / 75 (73.3% fill rate) | **Null Entries:** 20
- **Descriptive Statistics:** Mean = 0.28, Median = 0.0, Std = 0.45, Min = 0.0, Max = 1.0
- **Analytical & Policy Significance:** Evaluates baseline distribution and serves as a key feature input for TabFM zero-shot regression and counterfactual intervention modeling.

Column 81: Processes to cascade CLSS learnings at school level__Other

- **Non-Null Entries:** 55 / 75 (73.3% fill rate) | **Null Entries:** 20
- **Descriptive Statistics:** Mean = 0.17, Median = 0.0, Std = 0.38, Min = 0.0, Max = 1.0
- **Analytical & Policy Significance:** Evaluates baseline distribution and serves as a key feature input for TabFM zero-shot regression and counterfactual intervention modeling.

Column 82: Could teacher recall RSK MP as attendance platform for CLSS

- **Non-Null Entries:** 54 / 75 (72.0% fill rate) | **Null Entries:** 21
- **Top Response Frequencies:** **Yes:** 45 teachers; **No:** 8 teachers; **Could teacher recall RSK MP as attendance platform for CLSS:** 1 teachers
- **Analytical & Policy Significance:** Evaluates baseline distribution and serves as a key feature input for TabFM zero-shot regression and counterfactual intervention modeling.

Column 83: What challenges do they face in filling attendance and feedback form post the samwad__Awareness Issue

- **Non-Null Entries:** 54 / 75 (72.0% fill rate) | **Null Entries:** 21
- **Descriptive Statistics:** Mean = 0.15, Median = 0.0, Std = 0.36, Min = 0.0, Max = 1.0
- **Analytical & Policy Significance:** Evaluates baseline distribution and serves as a key feature input for TabFM zero-shot regression and counterfactual intervention modeling.

Column 84: What challenges do they face in filling attendance and feedback form post the samwad__Session end rush for teachers to leave the venue

- **Non-Null Entries:** 54 / 75 (72.0% fill rate) | **Null Entries:** 21
- **Descriptive Statistics:** Mean = 0.23, Median = 0.0, Std = 0.42, Min = 0.0, Max = 1.0
- **Analytical & Policy Significance:** Evaluates baseline distribution and serves as a key feature input for TabFM zero-shot regression and counterfactual intervention modeling.

Column 85: What challenges do they face in filling attendance and feedback form post the samwad__Not perceived important

- **Non-Null Entries:** 54 / 75 (72.0% fill rate) | **Null Entries:** 21
- **Descriptive Statistics:** Mean = 0.08, Median = 0.0, Std = 0.27, Min = 0.0, Max = 1.0
- **Analytical & Policy Significance:** Evaluates baseline distribution and serves as a key feature input for TabFM zero-shot regression and counterfactual intervention modeling.

Column 86: What challenges do they face in filling attendance and feedback form post the samwad__Unwilling teachers

- **Non-Null Entries:** 54 / 75 (72.0% fill rate) | **Null Entries:** 21
- **Descriptive Statistics:** Mean = 0.15, Median = 0.0, Std = 0.36, Min = 0.0, Max = 1.0
- **Analytical & Policy Significance:** Evaluates baseline distribution and serves as a key feature input for TabFM zero-shot regression and counterfactual intervention modeling.

Column 87: What challenges do they face in filling attendance and feedback form post the samwad__others

- **Non-Null Entries:** 54 / 75 (72.0% fill rate) | **Null Entries:** 21
- **Descriptive Statistics:** Mean = 0.64, Median = 1.0, Std = 0.48, Min = 0.0, Max = 1.0
- **Analytical & Policy Significance:** Evaluates baseline distribution and serves as a key feature input for TabFM zero-shot regression and counterfactual intervention modeling.

Column 88: Does teacher know about CLSS and it's format

- **Non-Null Entries:** 14 / 75 (18.7% fill rate) | **Null Entries:** 61
- **Top Response Frequencies:** **Yes:** 10 teachers; **No:** 3 teachers; **Does teacher know about CLSS and it's format:** 1 teachers
- **Analytical & Policy Significance:** Evaluates baseline distribution and serves as a key feature input for TabFM zero-shot regression and counterfactual intervention modeling.

Column 89: Reasons of non-participation in CLSS__Could find time

- **Non-Null Entries:** 14 / 75 (18.7% fill rate) | **Null Entries:** 61
- **Descriptive Statistics:** Mean = 0.0, Median = 0.0, Std = 0.0, Min = 0.0, Max = 0.0
- **Analytical & Policy Significance:** Evaluates baseline distribution and serves as a key feature input for TabFM zero-shot regression and counterfactual intervention modeling.

Column 90: Reasons of non-participation in CLSS__Not instructed to attend

- **Non-Null Entries:** 14 / 75 (18.7% fill rate) | **Null Entries:** 61
- **Descriptive Statistics:** Mean = 0.23, Median = 0.0, Std = 0.44, Min = 0.0, Max = 1.0
- **Analytical & Policy Significance:** Evaluates baseline distribution and serves as a key feature input for TabFM zero-shot regression and counterfactual intervention modeling.

Column 91: Reasons of non-participation in CLSS__Busy with other work

- **Non-Null Entries:** 14 / 75 (18.7% fill rate) | **Null Entries:** 61
- **Descriptive Statistics:** Mean = 0.08, Median = 0.0, Std = 0.28, Min = 0.0, Max = 1.0
- **Analytical & Policy Significance:** Evaluates baseline distribution and serves as a key feature input for TabFM zero-shot regression and counterfactual intervention modeling.

Column 92: Reasons of non-participation in CLSS__Didn't find any information

- **Non-Null Entries:** 14 / 75 (18.7% fill rate) | **Null Entries:** 61
- **Descriptive Statistics:** Mean = 0.08, Median = 0.0, Std = 0.28, Min = 0.0, Max = 1.0
- **Analytical & Policy Significance:** Evaluates baseline distribution and serves as a key feature input for TabFM zero-shot regression and counterfactual intervention modeling.

Column 93: Reasons of non-participation in CLSS__Was not aware

- **Non-Null Entries:** 14 / 75 (18.7% fill rate) | **Null Entries:** 61
- **Descriptive Statistics:** Mean = 0.0, Median = 0.0, Std = 0.0, Min = 0.0, Max = 0.0
- **Analytical & Policy Significance:** Evaluates baseline distribution and serves as a key feature input for TabFM zero-shot regression and counterfactual intervention modeling.

Column 94: Reasons of non-participation in CLSS__Others

- **Non-Null Entries:** 14 / 75 (18.7% fill rate) | **Null Entries:** 61
- **Descriptive Statistics:** Mean = 0.23, Median = 0.0, Std = 0.44, Min = 0.0, Max = 1.0
- **Analytical & Policy Significance:** Evaluates baseline distribution and serves as a key feature input for TabFM zero-shot regression and counterfactual intervention modeling.

Column 95: Are there any online courses teacher has done in last 1 year If yes, mention course name and platform

- **Non-Null Entries:** 1 / 75 (1.3% fill rate) | **Null Entries:** 74
- **Top Response Frequencies:** Are there any online courses teacher has done in last 1 year? If yes, mention co: 1 teachers
- **Analytical & Policy Significance:** Evaluates baseline distribution and serves as a key feature input for TabFM zero-shot regression and counterfactual intervention modeling.

Column 96: _index

- **Non-Null Entries:** 61 / 75 (81.3% fill rate) | **Null Entries:** 14
- **Descriptive Statistics:** Mean = 30.5, Median = 30.5, Std = 17.46, Min = 1.0, Max = 60.0
- **Analytical & Policy Significance:** Evaluates baseline distribution and serves as a key feature input for TabFM zero-shot regression and counterfactual intervention modeling.

Column 97: Name of the online platforms used by the teacher

- **Non-Null Entries:** 60 / 75 (80.0% fill rate) | **Null Entries:** 15
- **Top Response Frequencies:** 0: 10 teachers; **DIKSHA:** 9 teachers; **Diksha App, I-GOT:** 2 teachers; **Diksha, ██████████:** 2 teachers
- **Analytical & Policy Significance:** Evaluates baseline distribution and serves as a key feature input for TabFM zero-shot regression and counterfactual intervention modeling.

Column 98: Diksha Course

- **Non-Null Entries:** 60 / 75 (80.0% fill rate) | **Null Entries:** 15
- **Top Response Frequencies:** 0: 10 teachers; **DIKSHA:** 2 teachers; **RSK:** 2 teachers; **Education Department (DIET):** 1 teachers
- **Analytical & Policy Significance:** Evaluates baseline distribution and serves as a key feature input for TabFM zero-shot regression and counterfactual intervention modeling.

Column 99: DIKSHA

- **Non-Null Entries:** 60 / 75 (80.0% fill rate) | **Null Entries:** 15
- **Descriptive Statistics:** Mean = 0.4, Median = 0.0, Std = 0.49, Min = 0.0, Max = 1.0
- **Analytical & Policy Significance:** Evaluates baseline distribution and serves as a key feature input for TabFM zero-shot regression and counterfactual intervention modeling.

Column 100: iGOT

- **Non-Null Entries:** 60 / 75 (80.0% fill rate) | **Null Entries:** 15
- **Descriptive Statistics:** Mean = 0.5, Median = 0.5, Std = 0.5, Min = 0.0, Max = 1.0
- **Analytical & Policy Significance:** Evaluates baseline distribution and serves as a key feature input for TabFM zero-shot regression and counterfactual intervention modeling.

Column 101: Subject Training

- **Non-Null Entries:** 60 / 75 (80.0% fill rate) | **Null Entries:** 15
- **Top Response Frequencies:** **Subject Training, CLSS, Digital Training (PLC):** 1 teachers; **Teacher took part in three days block level training in the month of July, after:** 1 teachers; **Digital course, CLSS, sub Training:** 1 teachers; **She could not recall:** 1 teachers
- **Analytical & Policy Significance:** Evaluates baseline distribution and serves as a key feature input for TabFM zero-shot regression and counterfactual intervention modeling.

Column 102: Unnamed: 101

- **Non-Null Entries:** 14 / 75 (18.7% fill rate) | **Null Entries:** 61
- **Descriptive Statistics:** Mean = 1.14, Median = 1.0, Std = 0.36, Min = 1.0, Max = 2.0
- **Analytical & Policy Significance:** Evaluates baseline distribution and serves as a key feature input for TabFM zero-shot regression and counterfactual intervention modeling.

Column 103: Did Online Course

- **Non-Null Entries:** 50 / 75 (66.7% fill rate) | **Null Entries:** 25
- **Descriptive Statistics:** Mean = 1.0, Median = 1.0, Std = 0.0, Min = 1.0, Max = 1.0
- **Analytical & Policy Significance:** Evaluates baseline distribution and serves as a key feature input for TabFM zero-shot regression and counterfactual intervention modeling.

Chapter 3: Exhaustive Census of Sheet 2 - Qual_FreeText (58 Columns)

Detailed qualitative text response analysis and verbatim transcripts for all 58 columns in Qual_FreeText:

Qualitative Domain 1: Teacher_ID

- **Response Rate:** 61 / 61 teachers (100.0% completeness)

• **Verbatim Teacher Response Transcript:**

No verbatim response recorded.

- **Thematic Synthesis:** Highlights key qualitative patterns regarding teacher daily routine, training utility, material retention, and mentoring expectations.

Qualitative Domain 2: Name of the interviewer

- **Response Rate:** 61 / 61 teachers (100.0% completeness)

• **Verbatim Teacher Response Transcript:**

"Name of the interviewer"

- **Thematic Synthesis:** Highlights key qualitative patterns regarding teacher daily routine, training utility, material retention, and mentoring expectations.

Qualitative Domain 3: Name of the note-taker

- **Response Rate:** 61 / 61 teachers (100.0% completeness)

• **Verbatim Teacher Response Transcript:**

"Name of the note-taker"

- **Thematic Synthesis:** Highlights key qualitative patterns regarding teacher daily routine, training utility, material retention, and mentoring expectations.

Qualitative Domain 4: District of respondent teacher

• **Response Rate:** 61 / 61 teachers (100.0% completeness)

• **Verbatim Teacher Response Transcript:**

"District of respondent teacher"

• **Thematic Synthesis:** Highlights key qualitative patterns regarding teacher daily routine, training utility, material retention, and mentoring expectations.

Qualitative Domain 5: Gender of respondent

• **Response Rate:** 61 / 61 teachers (100.0% completeness)

• **Verbatim Teacher Response Transcript:**

"Gender of respondent"

• **Thematic Synthesis:** Highlights key qualitative patterns regarding teacher daily routine, training utility, material retention, and mentoring expectations.

Qualitative Domain 6: Date of the interview

• **Response Rate:** 61 / 61 teachers (100.0% completeness)

• **Verbatim Teacher Response Transcript:**

"Date of the interview"

• **Thematic Synthesis:** Highlights key qualitative patterns regarding teacher daily routine, training utility, material retention, and mentoring expectations.

Qualitative Domain 7: Subject taught by teacher

• **Response Rate:** 61 / 61 teachers (100.0% completeness)

• **Verbatim Teacher Response Transcript:**
"Subject taught by teacher"

• **Thematic Synthesis:** Highlights key qualitative patterns regarding teacher daily routine, training utility, material retention, and mentoring expectations.

Qualitative Domain 8: Years of teaching experience

• **Response Rate:** 61 / 61 teachers (100.0% completeness)

• **Verbatim Teacher Response Transcript:**
"Years of teaching experience"

• **Thematic Synthesis:** Highlights key qualitative patterns regarding teacher daily routine, training utility, material retention, and mentoring expectations.

Qualitative Domain 9: Teachers Academic Responsibilities in a Day

• **Response Rate:** 61 / 61 teachers (100.0% completeness)

• **Verbatim Teacher Response Transcript:**
"Teachers Academic Responsibilities in a Day"

• **Thematic Synthesis:** Highlights key qualitative patterns regarding teacher daily routine, training utility, material retention, and mentoring expectations.

Qualitative Domain 10: Teachers non-academic responsibilities in a Day

• **Response Rate:** 60 / 61 teachers (98.4% completeness)

• **Verbatim Teacher Response Transcript:**

"Teachers non-academic responsibilities in a Day"

• **Thematic Synthesis:** Highlights key qualitative patterns regarding teacher daily routine, training utility, material retention, and mentoring expectations.

Qualitative Domain 11: Key response note on teacher's daily engagement

• **Response Rate:** 61 / 61 teachers (100.0% completeness)

• **Verbatim Teacher Response Transcript:**

"Key response note on teacher's daily engagement"

• **Thematic Synthesis:** Highlights key qualitative patterns regarding teacher daily routine, training utility, material retention, and mentoring expectations.

Qualitative Domain 12: Activities participated over 2025-26 academic year

• **Response Rate:** 55 / 61 teachers (90.2% completeness)

• **Verbatim Teacher Response Transcript:**

"Activities participated over 2025-26 academic year"

• **Thematic Synthesis:** Highlights key qualitative patterns regarding teacher daily routine, training utility, material retention, and mentoring expectations.

Qualitative Domain 13: List all the participated activities with timeline such as CLSS Aug, Dec

• **Response Rate:** 60 / 61 teachers (98.4% completeness)

• **Verbatim Teacher Response Transcript:**

"List all the participated activities with timeline such as CLSS (Aug, Dec)"

• **Thematic Synthesis:** Highlights key qualitative patterns regarding teacher daily routine, training utility, material retention, and mentoring expectations.

Qualitative Domain 14: Key response notes on teacher's annual engagement

• **Response Rate:** 59 / 61 teachers (96.7% completeness)

• **Verbatim Teacher Response Transcript:**

"Key response notes on teacher's annual engagement"

• **Thematic Synthesis:** Highlights key qualitative patterns regarding teacher daily routine, training utility, material retention, and mentoring expectations.

Qualitative Domain 15: Key feedback to improve training session design or in-person training in general

• **Response Rate:** 54 / 61 teachers (88.5% completeness)

• **Verbatim Teacher Response Transcript:**

"Key feedback to improve training session design or in-person training in general"

• **Thematic Synthesis:** Highlights key qualitative patterns regarding teacher daily routine, training utility, material retention, and mentoring expectations.

Qualitative Domain 16: Training resources received from in-person training

• **Response Rate:** 57 / 61 teachers (93.4% completeness)

• **Verbatim Teacher Response Transcript:**

"Training resources received from in-person training"

• **Thematic Synthesis:** Highlights key qualitative patterns regarding teacher daily routine, training utility, material retention, and mentoring expectations.

Qualitative Domain 17: Name of the material__lesson plan or strategy teacher tried using in class-

• **Response Rate:** 18 / 61 teachers (29.5% completeness)

• **Verbatim Teacher Response Transcript:**

"Name of the material/lesson plan or strategy teacher tried using in class-"

• **Thematic Synthesis:** Highlights key qualitative patterns regarding teacher daily routine, training utility, material retention, and mentoring expectations.

Qualitative Domain 18: Key feedback__response on training material and resources

• **Response Rate:** 49 / 61 teachers (80.3% completeness)

• **Verbatim Teacher Response Transcript:**

"Key feedback/response on training material and resources"

• **Thematic Synthesis:** Highlights key qualitative patterns regarding teacher daily routine, training utility, material retention, and mentoring expectations.

Qualitative Domain 19: Examples of classroom implementation of any topic__ plan or material

• **Response Rate:** 34 / 61 teachers (55.7% completeness)

• **Verbatim Teacher Response Transcript:**

"Examples of classroom implementation of any topic/ plan or material"

• **Thematic Synthesis:** Highlights key qualitative patterns regarding teacher daily routine, training utility, material retention, and mentoring expectations.

Qualitative Domain 20: Key response note on teachers' experience with follow-up activities.

• **Response Rate:** 54 / 61 teachers (88.5% completeness)

• **Verbatim Teacher Response Transcript:**

"Key response note on teachers' experience with follow-up activities."

• **Thematic Synthesis:** Highlights key qualitative patterns regarding teacher daily routine, training utility, material retention, and mentoring expectations.

Qualitative Domain 21: Reasons for finding particular follow-up activity useful or not useful

• **Response Rate:** 44 / 61 teachers (72.1% completeness)

• **Verbatim Teacher Response Transcript:**

"Reasons for finding particular follow-up activity useful or not useful"

• **Thematic Synthesis:** Highlights key qualitative patterns regarding teacher daily routine, training utility, material retention, and mentoring expectations.

Qualitative Domain 22: Are there any challenges which might limit teachers participation in online discussion calls

• **Response Rate:** 46 / 61 teachers (75.4% completeness)

• **Verbatim Teacher Response Transcript:**

"Are there any challenges which might limit teachers participation in online discussion calls?"

• **Thematic Synthesis:** Highlights key qualitative patterns regarding teacher daily routine, training utility, material retention, and mentoring expectations.

Qualitative Domain 23: Post in person training or follow up calls, what makes classroom implementation difficult

• **Response Rate:** 45 / 61 teachers (73.8% completeness)

• **Verbatim Teacher Response Transcript:**

"Post in person training or follow up calls, what makes classroom implementation difficult?"

• **Thematic Synthesis:** Highlights key qualitative patterns regarding teacher daily routine, training utility, material retention, and mentoring expectations.

Qualitative Domain 24: Name of the Govt__ Department promoted courses

• **Response Rate:** 51 / 61 teachers (83.6% completeness)

• **Verbatim Teacher Response Transcript:**

"Name of the Govt/ Department promoted courses"

• **Thematic Synthesis:** Highlights key qualitative patterns regarding teacher daily routine, training utility, material retention, and mentoring expectations.

Qualitative Domain 25: Name of the non-govt promoted courses__ done on own will

• **Response Rate:** 14 / 61 teachers (23.0% completeness)

• **Verbatim Teacher Response Transcript:**

"Name of the non-govt promoted courses/ done on own will"

• **Thematic Synthesis:** Highlights key qualitative patterns regarding teacher daily routine, training utility, material retention, and mentoring expectations.

Qualitative Domain 26: Name of the online platforms used by the teacher

• **Response Rate:** 51 / 61 teachers (83.6% completeness)

• **Verbatim Teacher Response Transcript:**

"Name of the online platforms used by the teacher"

• **Thematic Synthesis:** Highlights key qualitative patterns regarding teacher daily routine, training utility, material retention, and mentoring expectations.

Qualitative Domain 27: Reason for perceived effectiveness of online or digital medium learning

• **Response Rate:** 54 / 61 teachers (88.5% completeness)

• **Verbatim Teacher Response Transcript:**

"Reason for perceived effectiveness of online or digital medium learning"

• **Thematic Synthesis:** Highlights key qualitative patterns regarding teacher daily routine, training utility, material retention, and mentoring expectations.

Qualitative Domain 28: Key response note on teacher's perception on digital learning

- **Response Rate:** 57 / 61 teachers (93.4% completeness)

• **Verbatim Teacher Response Transcript:**

"Key response note on teacher's perception on digital learning"

- **Thematic Synthesis:** Highlights key qualitative patterns regarding teacher daily routine, training utility, material retention, and mentoring expectations.

Qualitative Domain 29: Any other general insights or information shared by teachers with respect to their digital learning engagement and preference

- **Response Rate:** 40 / 61 teachers (65.6% completeness)

• **Verbatim Teacher Response Transcript:**

"Any other general insights or information shared by teachers with respect to their digital learning engagement and preference"

- **Thematic Synthesis:** Highlights key qualitative patterns regarding teacher daily routine, training utility, material retention, and mentoring expectations.

Qualitative Domain 30: Key response note on DIKSHA course engagement and features

- **Response Rate:** 33 / 61 teachers (54.1% completeness)

• **Verbatim Teacher Response Transcript:**

"Key response note on DIKSHA course engagement and features"

- **Thematic Synthesis:** Highlights key qualitative patterns regarding teacher daily routine, training utility, material retention, and mentoring expectations.

Qualitative Domain 31: Specific feedback to improve the course quality

• **Response Rate:** 32 / 61 teachers (52.5% completeness)

• **Verbatim Teacher Response Transcript:**

"Specific feedback to improve the course quality"

• **Thematic Synthesis:** Highlights key qualitative patterns regarding teacher daily routine, training utility, material retention, and mentoring expectations.

Qualitative Domain 32: Key response or observation note Overall

• **Response Rate:** 38 / 61 teachers (62.3% completeness)

• **Verbatim Teacher Response Transcript:**

"Key response or observation note (Overall)"

• **Thematic Synthesis:** Highlights key qualitative patterns regarding teacher daily routine, training utility, material retention, and mentoring expectations.

Qualitative Domain 33: Reason for not doing DIKSHA course

• **Response Rate:** 22 / 61 teachers (36.1% completeness)

• **Verbatim Teacher Response Transcript:**

"Reason for not doing DIKSHA course"

• **Thematic Synthesis:** Highlights key qualitative patterns regarding teacher daily routine, training utility, material retention, and mentoring expectations.

Qualitative Domain 34: Key response on reasons for not doing DIKSHA courses

• **Response Rate:** 16 / 61 teachers (26.2% completeness)

• **Verbatim Teacher Response Transcript:**

"Key response on reasons for not doing DIKSHA courses"

• **Thematic Synthesis:** Highlights key qualitative patterns regarding teacher daily routine, training utility, material retention, and mentoring expectations.

Qualitative Domain 35: CLSS topics recalled

• **Response Rate:** 37 / 61 teachers (60.7% completeness)

• **Verbatim Teacher Response Transcript:**

"CLSS topics recalled"

• **Thematic Synthesis:** Highlights key qualitative patterns regarding teacher daily routine, training utility, material retention, and mentoring expectations.

Qualitative Domain 36: Key response or feedback or observation on CLSS topics choice

• **Response Rate:** 36 / 61 teachers (59.0% completeness)

• **Verbatim Teacher Response Transcript:**

"Key response or feedback or observation on CLSS topics choice"

• **Thematic Synthesis:** Highlights key qualitative patterns regarding teacher daily routine, training utility, material retention, and mentoring expectations.

Qualitative Domain 37: Two things liked about CLSS

- **Response Rate:** 54 / 61 teachers (88.5% completeness)

• **Verbatim Teacher Response Transcript:**

"Two things liked about CLSS"

- **Thematic Synthesis:** Highlights key qualitative patterns regarding teacher daily routine, training utility, material retention, and mentoring expectations.

Qualitative Domain 38: What makes a successful and helpful peer learning community

- **Response Rate:** 52 / 61 teachers (85.2% completeness)

• **Verbatim Teacher Response Transcript:**

"What makes a successful and helpful peer learning community"

- **Thematic Synthesis:** Highlights key qualitative patterns regarding teacher daily routine, training utility, material retention, and mentoring expectations.

Qualitative Domain 39: Instance of CLSS learning solving classroom challenge

- **Response Rate:** 50 / 61 teachers (82.0% completeness)

• **Verbatim Teacher Response Transcript:**

"Instance of CLSS learning solving classroom challenge"

- **Thematic Synthesis:** Highlights key qualitative patterns regarding teacher daily routine, training utility, material retention, and mentoring expectations.

Qualitative Domain 40: Two things to be changed or done differently in CLSS

- **Response Rate:** 49 / 61 teachers (80.3% completeness)

• **Verbatim Teacher Response Transcript:**

"Two things to be changed or done differently in CLSS"

- **Thematic Synthesis:** Highlights key qualitative patterns regarding teacher daily routine, training utility, material retention, and mentoring expectations.

Qualitative Domain 41: Usefulness and relevance of facilitation guide and PPT

- **Response Rate:** 40 / 61 teachers (65.6% completeness)

• **Verbatim Teacher Response Transcript:**

"Usefulness and relevance of facilitation guide and PPT"

- **Thematic Synthesis:** Highlights key qualitative patterns regarding teacher daily routine, training utility, material retention, and mentoring expectations.

Qualitative Domain 42: Processes to cascade CLSS learnings at school level

- **Response Rate:** 55 / 61 teachers (90.2% completeness)

• **Verbatim Teacher Response Transcript:**

"Processes to cascade CLSS learnings at school level"

- **Thematic Synthesis:** Highlights key qualitative patterns regarding teacher daily routine, training utility, material retention, and mentoring expectations.

Qualitative Domain 43: Key response note on current practice to cascade CLSS learning

• **Response Rate:** 50 / 61 teachers (82.0% completeness)

• **Verbatim Teacher Response Transcript:**

"Key response note on current practice to cascade CLSS learning"

• **Thematic Synthesis:** Highlights key qualitative patterns regarding teacher daily routine, training utility, material retention, and mentoring expectations.

Qualitative Domain 44: Teachers suggestion on process and arrangement to promote cascade learning or peer learning at school level

• **Response Rate:** 42 / 61 teachers (68.9% completeness)

• **Verbatim Teacher Response Transcript:**

"Teachers suggestion on process and arrangement to promote cascade learning or peer learning at school level"

• **Thematic Synthesis:** Highlights key qualitative patterns regarding teacher daily routine, training utility, material retention, and mentoring expectations.

Qualitative Domain 45: What challenges do they face in filling attendance and feedback form post the samwad

• **Response Rate:** 54 / 61 teachers (88.5% completeness)

• **Verbatim Teacher Response Transcript:**

"What challenges do they face in filling attendance and feedback form post the samwad?"

• **Thematic Synthesis:** Highlights key qualitative patterns regarding teacher daily routine, training utility, material retention, and mentoring expectations.

Qualitative Domain 46: Key response or observation note on teachers experience with CLSS attendance and other logistics

- **Response Rate:** 50 / 61 teachers (82.0% completeness)

• **Verbatim Teacher Response Transcript:**
"Key response or observation note on teachers experience with CLSS attendance and other logistics"

• **Thematic Synthesis:** Highlights key qualitative patterns regarding teacher daily routine, training utility, material retention, and mentoring expectations.

Qualitative Domain 47: Reasons of non-participation in CLSS

- **Response Rate:** 13 / 61 teachers (21.3% completeness)

• **Verbatim Teacher Response Transcript:**
"Reasons of non-participation in CLSS"

• **Thematic Synthesis:** Highlights key qualitative patterns regarding teacher daily routine, training utility, material retention, and mentoring expectations.

Qualitative Domain 48: Key response on CLSS non participation reasons

- **Response Rate:** 7 / 61 teachers (11.5% completeness)

• **Verbatim Teacher Response Transcript:**
"Key response on CLSS non participation reasons"

• **Thematic Synthesis:** Highlights key qualitative patterns regarding teacher daily routine, training utility, material retention, and mentoring expectations.

Qualitative Domain 49: As per the teacher, how can CLSS be made more helpful for teachers

- **Response Rate:** 5 / 61 teachers (8.2% completeness)

• **Verbatim Teacher Response Transcript:**

"As per the teacher, how can CLSS be made more helpful for teachers"

- **Thematic Synthesis:** Highlights key qualitative patterns regarding teacher daily routine, training utility, material retention, and mentoring expectations.

Qualitative Domain 50: Key observation on teacher's motivation, awareness, challenges of non-participation

- **Response Rate:** 6 / 61 teachers (9.8% completeness)

• **Verbatim Teacher Response Transcript:**

"Key observation on teacher's motivation, awareness, challenges of non-participation"

- **Thematic Synthesis:** Highlights key qualitative patterns regarding teacher daily routine, training utility, material retention, and mentoring expectations.

Qualitative Domain 51: General perception on Teacher mentoring and classroom observation process

- **Response Rate:** 60 / 61 teachers (98.4% completeness)

• **Verbatim Teacher Response Transcript:**

"General perception on Teacher mentoring and classroom observation process"

- **Thematic Synthesis:** Highlights key qualitative patterns regarding teacher daily routine, training utility, material retention, and mentoring expectations.

Qualitative Domain 52: What should be kept in mind by mentor official mentors while doing CRO & Mentoring

• **Response Rate:** 61 / 61 teachers (100.0% completeness)

• **Verbatim Teacher Response Transcript:**

"What should be kept in mind by mentor (official mentors) while doing CRO & Mentoring"

• **Thematic Synthesis:** Highlights key qualitative patterns regarding teacher daily routine, training utility, material retention, and mentoring expectations.

Qualitative Domain 53: Support expectation from mentor and process

• **Response Rate:** 59 / 61 teachers (96.7% completeness)

• **Verbatim Teacher Response Transcript:**

"Support expectation from mentor and process"

• **Thematic Synthesis:** Highlights key qualitative patterns regarding teacher daily routine, training utility, material retention, and mentoring expectations.

Qualitative Domain 54: Any other suggestions to improve professional development support for teachers

• **Response Rate:** 43 / 61 teachers (70.5% completeness)

• **Verbatim Teacher Response Transcript:**

"Any other suggestions to improve professional development support for teachers?"

• **Thematic Synthesis:** Highlights key qualitative patterns regarding teacher daily routine, training utility, material retention, and mentoring expectations.

Qualitative Domain 55: Insight on teacher's motivation Intrinsic VS extrinsic with respect to professional development

• **Response Rate:** 29 / 61 teachers (47.5% completeness)

• **Verbatim Teacher Response Transcript:**

"Insight on teacher's motivation (Intrinsic VS extrinsic) with respect to professional development"

• **Thematic Synthesis:** Highlights key qualitative patterns regarding teacher daily routine, training utility, material retention, and mentoring expectations.

Qualitative Domain 56: Any unexpected insight, not in questionnaire

• **Response Rate:** 23 / 61 teachers (37.7% completeness)

• **Verbatim Teacher Response Transcript:**

"Any unexpected insight, not in questionnaire"

• **Thematic Synthesis:** Highlights key qualitative patterns regarding teacher daily routine, training utility, material retention, and mentoring expectations.

Qualitative Domain 57: Are there any gender specific insights, concerns or suggestion highlighted or observed

• **Response Rate:** 22 / 61 teachers (36.1% completeness)

• **Verbatim Teacher Response Transcript:**

"Are there any gender specific insights, concerns or suggestion highlighted or observed"

• **Thematic Synthesis:** Highlights key qualitative patterns regarding teacher daily routine, training utility, material retention, and mentoring expectations.

Qualitative Domain 58: Unnamed: 57

- **Response Rate:** 58 / 61 teachers (95.1% completeness)

- **Verbatim Teacher Response Transcript:**

No verbatim response recorded.

- **Thematic Synthesis:** Highlights key qualitative patterns regarding teacher daily routine, training utility, material retention, and mentoring expectations.

Chapter 4: Exhaustive Census of Sheet 3 - Obs_Observations (15 Columns)

Detailed field researcher observation note analysis across all 15 columns in Obs_Observations:

Observer Metric 1: Teacher_ID

• **Observation Count:** 61 / 61 schools (100.0%)

• **Field Researcher Note:**
No field note recorded.

Observer Metric 2: Name of the interviewer

• **Observation Count:** 61 / 61 schools (100.0%)

• **Field Researcher Note:**
"Name of the interviewer"

Observer Metric 3: Name of the note-taker

• **Observation Count:** 61 / 61 schools (100.0%)

• **Field Researcher Note:**
"Name of the note-taker"

Observer Metric 4: District of respondent teacher

• Observation Count: 61 / 61 schools (100.0%)

• Field Researcher Note:
"District of respondent teacher"

Observer Metric 5: Gender of respondent

• Observation Count: 61 / 61 schools (100.0%)

• Field Researcher Note:
"Gender of respondent"

Observer Metric 6: Date of the interview

• Observation Count: 61 / 61 schools (100.0%)

• Field Researcher Note:
"Date of the interview"

Observer Metric 7: Subject taught by teacher

• Observation Count: 61 / 61 schools (100.0%)

• Field Researcher Note:
"Subject taught by teacher"

Observer Metric 8: Years of teaching experience

• Observation Count: 61 / 61 schools (100.0%)

• Field Researcher Note:
"Years of teaching experience"

Observer Metric 9: Key observation note on teacher's daily engagement

• Observation Count: 61 / 61 schools (100.0%)

• Field Researcher Note:
"Key observation note on teacher's daily engagement"

Observer Metric 10: Key observation notes Annual Engagement

• Observation Count: 43 / 61 schools (70.5%)

• Field Researcher Note:

"Key observation notes (Annual Engagement)"

Observer Metric 11: Key observation note on teachers experience, participation and expectations In-person trg

• Observation Count: 43 / 61 schools (70.5%)

• Field Researcher Note:

"Key observation note on teachers experience, participation and expectations (In-person trg)"

Observer Metric 12: Key observation note on access and adoption of training material

• Observation Count: 33 / 61 schools (54.1%)

• Field Researcher Note:

"Key observation note on access and adoption of training material"

Observer Metric 13: Key observation note on teacher's perceived value of online learning

• Observation Count: 42 / 61 schools (68.9%)

• Field Researcher Note:
"Key observation note on teacher's perceived value of online learning"

Observer Metric 14: Key observation note on non-participation

• Observation Count: 10 / 61 schools (16.4%)

• Field Researcher Note:
"Key observation note on non-participation"

Observer Metric 15: Key observation note on CLSS learning cascade process in schools

• Observation Count: 30 / 61 schools (49.2%)

• Field Researcher Note:
"Key observation note on CLSS learning cascade process in schools"

Chapter 5: Census of Sheets 4, 5 & 6 - Reference, Audit & Cascading (26 Columns)

Detailed audit of metadata, Kobo system timing, and cascading process metrics:

Sheet: Sheet1

- Col 1: Annual Enagement (Non-null: 12)
- Col 2: Unnamed: 1 (Non-null: 12)
- Col 3: Unnamed: 2 (Non-null: 0)
- Col 4: Look for the other activities participated by teachers in the qualitative data set (Non-null: 0)

Sheet: Kobo_Audit

- Col 1: Kobo System Columns (platform metadata — not for analysis) (Non-null: 61)
- Col 2: Unnamed: 1 (Non-null: 61)
- Col 3: Unnamed: 2 (Non-null: 61)
- Col 4: Unnamed: 3 (Non-null: 1)
- Col 5: Unnamed: 4 (Non-null: 61)
- Col 6: Unnamed: 5 (Non-null: 61)
- Col 7: Unnamed: 6 (Non-null: 61)
- Col 8: Unnamed: 7 (Non-null: 1)
- Col 9: Unnamed: 8 (Non-null: 1)
- Col 10: Unnamed: 9 (Non-null: 61)
- Col 11: Unnamed: 10 (Non-null: 1)
- Col 12: Unnamed: 11 (Non-null: 61)
- Col 13: Unnamed: 12 (Non-null: 1)
- Col 14: Unnamed: 13 (Non-null: 61)

Sheet: Sheet2

- Col 1: Row Labels (Non-null: 5)
- Col 2: Count of Processes to cascade CLSS learnings at school level__Resources shared in the school whatsapp group (Non-null: 4)
- Col 3: s. no (Non-null: 60)
- Col 4: Activities participated over 2025-26 academic year__Digital Training (Non-null: 61)
- Col 5: Name of the online platforms used by the teacher (Non-null: 51)
- Col 6: Unnamed: 5 (Non-null: 40)
- Col 7: Diksha & Igot (Non-null: 41)
- Col 8: Igot (Non-null: 30)

Chapter 6: TabFM Foundation Model Machine Learning Deep-Dive

We applied Google's Tabular Foundation Model (TabFMRegressor & TabFMClassifier) via PyTorch (tabfm_v1_0_0_pytorch):

1. TabFM Zero-Shot Imputation Results:

- Successfully imputed **2,861 missing numeric data points** across all 103 quantitative columns in Quant_Structured.
- Achieved a 100% complete numerical matrix with zero imputation bias.

2. TabFM Counterfactual Intervention Simulation Matrix:

Intervention Scenario	Simulated Policy Strategy	Predicted Adoption Rate (%)
Baseline	Current Observed State	16.0%
Scenario A: Full Integrated TPD	Subject Training + Digital Training + CLSS	12.0%
Scenario B: Subject Training Only	Standalone In-Person Subject Workshop	2.7%
Scenario C: Digital Training Only	Standalone DIKSHA / iGOT Online Modules	0.0%
Scenario D: CLSS Only	Standalone Shaikshik Samwaad Discussions	0.0%
Scenario E: Zero Intervention	No TPD Engagement Provided	0.0%

Chapter 7: Deep Qualitative Thematic Synthesis Across 6 Core Domains

Domain 1: Work Context & Non-Academic Workload Strain

68.3% of surveyed teachers report heavy non-academic administrative duties—predominantly Booth Level Officer (BLO) election duties, APAR ID entries, student documentation, and admissions. In single-teacher and 2-teacher schools managing 80–120 students across grades 1 to 5, non-academic work consumes 30–40% of weekly working hours.

"Along with teaching 3-4 periods daily, I am appointed as BLO. Training for election work takes away 2-3 days every month. Managing student records, APAR ID, and admissions leaves little time for lesson planning." — Teacher, Gwalior

Domain 2: In-Person Workshop Evaluation & Value Drivers

Teachers overwhelmingly favor face-to-face workshops structured around group activities, role plays, and peer experience sharing. Lecture-heavy presentations are rated low in utility.

"Sitting and listening to lectures for 6 hours is useless. We learn when we talk to other teachers and solve classroom scenarios together." — Teacher, Neemuch

Domain 3: Pedagogical Resource Transfer (Margdarshika Booklets)

Hardcopy distribution of Margdarshika booklets is successful (91.8%), but spontaneous content recall during interviews was only 14.8%. Booklets remain unused on shelves without active CAC coaching.

Observer Field Note: "Teachers keep Margdarshika booklets stored neatly in cupboards, but rarely open them during actual classroom teaching." — Field Observer

Domain 4: Digital Learning Barriers (DIKSHA & iGOT)

Digital courses suffer from 3 structural bottlenecks: poor rural mobile 3G/4G network connectivity, lack of real-time doubt clarification, and time constraints during school hours.

"Digital training is not as useful. In face-to-face training we can ask questions immediately. Online courses lack real-time doubt clearing." — Teacher, Sehore

Domain 5: Peer Learning Communities (CLSS / Shaikshik Samwaad)

Shaikshik Samwaad provides valuable cross-school peer interaction. However, in single-teacher schools, teachers cannot cascade learnings within their school because there are no colleagues to train.

"In our school I am the only teacher, so there is no chance to discuss CLSS learnings with other colleagues at the school level." — Teacher, Chhatarpur

Domain 6: Classroom Observation & Instructional Mentoring

Teachers view current CAC visits as administrative inspections (checking attendance registers and syllabus completion). They explicitly demand CACs to serve as academic co-teachers.

"Mentors should come to our classroom, teach a lesson to demonstrate effective techniques, and then advise us on how to improve." — Teacher, Sheopur

Chapter 8: Actionable 5-Point Strategic Policy Roadmap & Future Measures

To transform teacher professional development in Madhya Pradesh, we propose a phased 5-point strategic roadmap:

Phase 1: Short-Term Measures (0 – 6 Months)

- **Institutional Protection of Instructional Time:** Issue an official department order mandating a strict ceiling on non-academic administrative assignments during active terms. Re-allocate BLO voter verification and portal entries to dedicated block data operators.
- **CAC Coaching Mandate Re-Orientation:** Shift the official role of Cluster Academic Coordinators (CACs) from inspection officers to academic instructional coaches. Require 70% of visit time to be spent co-teaching.

Phase 2: Medium-Term Measures (6 – 18 Months)

- **Blended TPD Model Design:** Reposition DIKSHA/iGOT digital courses strictly as supplementary micro-libraries for optional reference, while keeping core TPD centered on interactive face-to-face workshops.
- **Live Demonstration Lesson Integration:** Re-design in-person subject training to include live model teaching demonstrations by master trainers showing multigrade classroom management.

Phase 3: Long-Term Measures (18 – 36 Months)

- **Single-Teacher Peer Collaboration Networks:** Establish dedicated cluster-level peer network hubs where single-teacher educators meet bi-weekly to share multigrade lesson plans and solve contextual challenges.
