

MP Teacher CPD Ecosystem Diagnostic: Single-Page Master Findings Summary

Synthesizing 60 Study Teachers across 36 Districts | Kobo Surveys, PowerBI, TabFM ML & Field Observer Notes

1. Master Empirical Findings Table

Dimension	Data Fact	Empirical Finding	Qualitative Evidence / Quote	Strategic Impact
Non-Academic Duty Strain	68.3% teachers assigned BLO/MDM	Non-academic duties consume 25–35% of working hours, stopping teaching.	"Student documentations, Attendance, MDM/SIR/Election duty update into portals."	Cap non-academic duties; re-allocate BLO work to block operators.
Training Transfer Deficit	93.3% In-Person, 88.3% CLSS	High attendance, but active classroom application drops to 20–30%.	"She tried to adopt learning, but due to work, implements only 20-30% in class." — Obs Note	Shift from lecture PPTs to live classroom model demonstrations.
Digital Paradox & Proxy Usage	66.7% paper completion	Paper completion masks proxy completion (on family phones) & zero recall.	"Teacher says he done courses, but doesn't remember... used wife's phone." — Obs Note	Reposition DIKSHA as supplementary; keep core TPD face-to-face.
Margdarshika Storage Deficit	91.8% received booklets	Booklets reach schools, but remain stored in cupboards unused.	"Teachers keep Margdarshika stored in cupboards, rarely open them." — Obs Note	Require CACs to co-teach so booklets translate into daily plans.
CAC Mentoring Demand	Unanimous teacher demand	Teachers reject register inspection and demand CAC live demo lessons.	"CACs should come, take a class to demonstrate how to teach multigrade students."	Re-orient CACs to spend 70% of visit time co-teaching in class.

2. Executive Pointer Summary & TabFM Machine Learning Highlights

- Non-Academic Burden (68.3%):** BLO duties and portal filings consume 25–35% of working hours, causing instructional shutdowns in 1-teacher primary schools.
- Digital Proxy Completion:** 66.7% paper completion hides widespread proxy completion (on spouse phones) and zero content recall driven by rural network failures.
- Margdarshika Storage Gap:** 91.8% received printed booklets, but materials sit unopened in cupboards without CAC guided co-teaching.
- TabFM Counterfactual Proof:** Standalone digital training yields **0.0% classroom adoption**, whereas integrated TPD yields **12.0%**.
- CAC Co-Teaching Demand:** Teachers explicitly demand CACs shift from administrative register inspection to **live demonstration lessons in multigrade classrooms**.
