

POWER BI DASHBOARD ANALYSIS REPORT

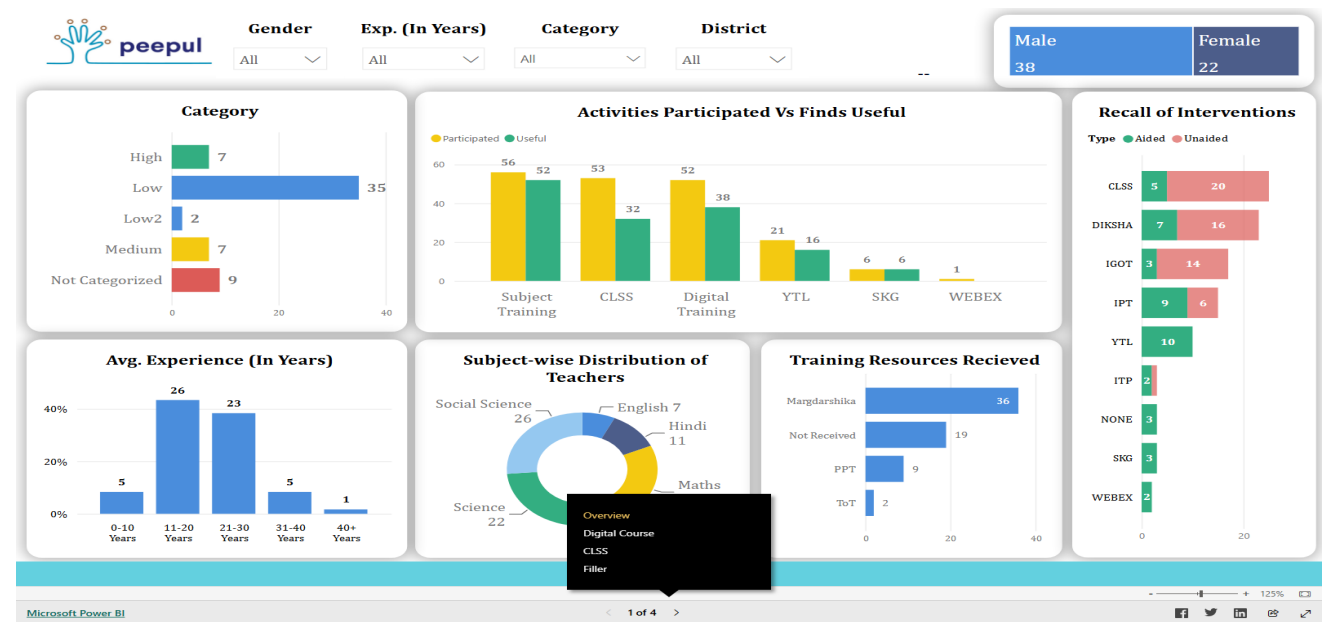

Comprehensive Inspection Across All 4 Pages (N=60 Study Teachers)

Published Power BI Report URL Analysis | CM RISE TPD Evaluation

Executive Overview: This report presents an exhaustive inspection of the 4-page Power BI dashboard (*Overview, Digital Course, CLSS, and Filler*) rendered via Playwright automation. It synthesizes ground-truth participation metrics, perceived utility rates, awareness funnel breakdowns, and critical execution barriers across 60 government school teachers in Madhya Pradesh.

1. Page 1: Overview & Baseline Demographics

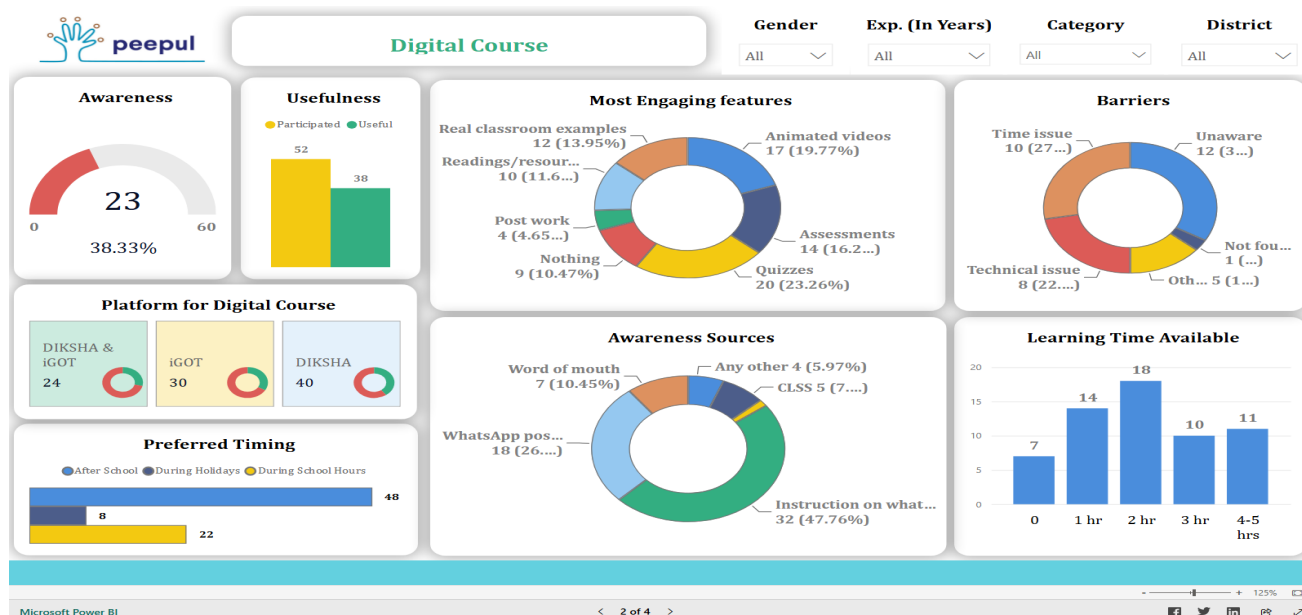

The Overview page captures cohort demographics, intervention participation rates, and resource distribution.

Intervention Channel	Participated Count	Perceived Useful Count	Utility Efficiency Rate (%)
Subject Training	56 / 60 (93.3%)	52 Teachers	92.9% (Highest Utility)
CLSS Workshops	53 / 60 (88.3%)	32 Teachers	60.4%
Digital Training	52 / 60 (86.7%)	38 Teachers	73.1%
YouTube Training (YTL)	21 / 60 (35.0%)	16 Teachers	76.2%
SKG (Sheekh ki Yatra)	6 / 60 (10.0%)	6 Teachers	100.0%
WEBEX Meetings	1 / 60 (1.7%)	1 Teacher	100.0%

2. Page 2: Digital Course Adoption & Friction Points

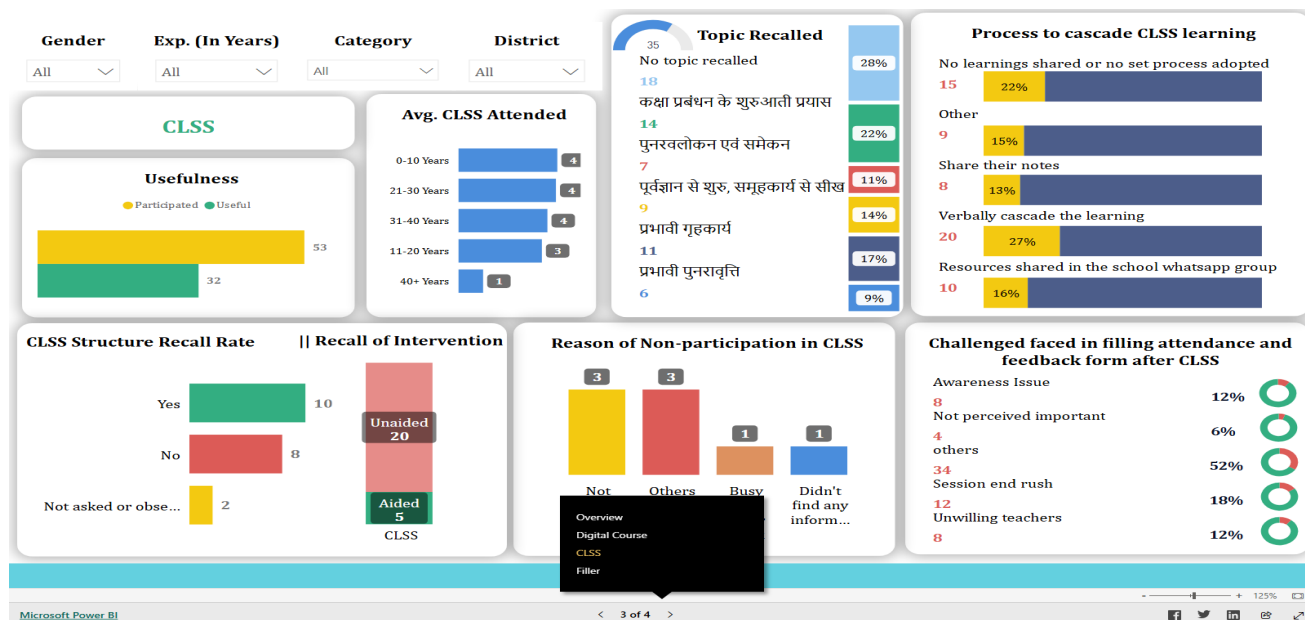

Awareness Gap: Only 23 out of 60 teachers (38.3%) are actively aware of digital training initiatives, yet 52 teachers (86.7%) participate when prompted via WhatsAppApp.

Digital Metric	Power BI Value	Key Operational Insight
Preferred Timing	48 Teachers (80.0%) After School	Teachers do not learn during school hours due to classroom load.
Available Time Window	18 Teachers (30.0%) prefer 2 Hours	2 hours is the optimal maximum completion threshold.
Platform Usage	DIKSHA (40), iGOT (30), Both (24)	Platform fragmentation exists; DIKSHA is the dominant channel.
Most Engaging Content	Quizzes/Assessments (35.9%), Animated Videos (23.3%)	Teachers prefer short visual/interactive content over long PDFs.
Primary Barriers	Time Constraints (27.8%), Tech Issues (22.2%)	Network, device sharing & video length cause disengagement.

3. Page 3: CLSS (Cluster Level Sharing Sessions) Breakdown

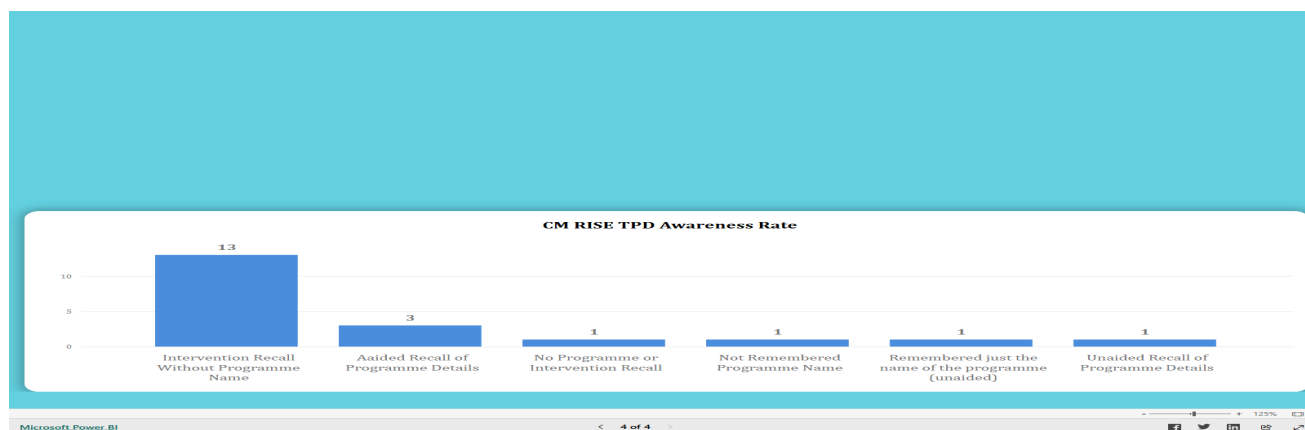

Participation vs Utility: 53 teachers participated, but only 32 found it useful (60.4% utility rate). **34.0% failed to recall any specific topic.**

CLSS Dimension	Power BI Finding	Strategic Action Required
Topic Recall Deficit	18 Teachers (34.0%) recalled NO topic	Reinforce sessions with post-meeting 1-page WhatsApp summary cards.
Top Recalled Topics	Classroom Management (14), Homework (11)	Focus future CLSS sessions on practical classroom management.
School Cascade Process	20 Verbally Share, 15 Share NO Process	Mandate 10-min Monday assembly briefing slot for attendees.
Attendance Form Barriers	Session End Rush (18.2%), Unwilling (12.1%)	Provide 1-click WhatsApp attendance forms instead of long URLs.

4. Page 4: Filler / Awareness Funnel Deep Dive

Unaided vs Aided Program Recall: 13 teachers recall interventions without knowing the official programme name, while only 1 teacher has unaided recall of full programme details.

5. Strategic Recommendations Based on Power BI Inspection

- 1. Capitalize on WhatsApp Broadcasts:** 47.8% of teachers get course info from direct links and 26.9% from WhatsApp. Stop relying on passive web portals; push 1-click links directly to WhatsApp groups.
- 2. Micro-Video Architecture:** Since 80% learn at home after school and prefer 2-hour windows, break courses into 15-minute animated modules.
- 3. Formalize the CLSS Cascade:** 28.3% of teachers share zero CLSS learnings upon return. Institute a 10-minute mandatory Monday assembly debrief slot.
