

QUALITATIVE RESEARCH ANALYSIS & EVIDENCE REPORT

Empirical Findings Across 60 Study Teachers in Madhya Pradesh

State Education Department & RSK MP | CM RISE TPD Evaluation

Executive Summary: Operationalizing the Qualitative Research Concept Note, this report provides an empirical synthesis of raw free-text survey responses, observer logs, and field notes across N=60 study teachers. It answers the 4 core Research Questions (RQs) regarding lesson plan execution, digital course compliance, CLSS cascading mechanisms, and systemic administrative friction.

1. RQ1: Pedagogical Translation & Lesson Plan Execution

Finding: Teachers implement only 20–30% of Margdarshika lesson plans because activities assume idealized single-grade classrooms rather than multi-grade or high-enrollment setups.

Direct Field Evidence:

"■■■■■ ■■■■■■ ■■■■■■■■■■ ■■ 20% ■■ ■■ ■■■■■■■■■■ ■■ ■■■■ ■■ ■■■■■■■■■■ ■■■ ■■ ■■■■ ■■
administrative ■■■■■■ ■■■■■■■■■■ ■■■ ■■ ■■■■■■■■■■ ■■ ■■■■■■■■■■ ■■■■■■■■■■ ■■ ■■■■ ■■ ■■■■■■■■■■
■■■■■ ■■ ■■■■ ■■ ■■■■■■■■■■"

"■■■■ ■■■■■■■■■■ ■■■■ ■■ ■■■■ ■■■ ■■■■ ■■■■ ■■■■■■■■■■"

"She tried sometimes but due to strength of students and management of student, she was not doing it on a regular basis."

Recommendation: Re-engineer Margdarshika to include explicit multi-grade classroom activity adaptations.

2. RQ2: Digital Engagement & Compliance vs. True Learning

Finding: High digital course completion (52/60) is driven by compliance pressure. Teachers routinely start long videos in the background while doing other tasks.

Direct Field Evidence:

"He just did the course without listening the content, he just share politically right answer."

"Time is the problem, acc to him courses are of long duration... he generally starts the course and do some other courses."

"Completed most of the courses using his wife's phone, primarily based on instructions from administration... finds in-person training more effective."

Recommendation: Shift from long 2-hour modules to 15-minute micro-videos with mandatory checkpoint quizzes.

3. RQ3: CLSS Cascade Mechanics & Peer Learning

Finding: CLSS peer knowledge transfer is 100% informal, taking place in casual hallway chats with no structured school briefing mechanism.

Direct Field Evidence:

[illegible]

"There is no process placed to cascade learning of the CLSS with their teacher who did not participate."

[illegible]

Recommendation: Mandate a 10-minute Monday assembly debrief slot for CLSS attendees to present takeaways to colleagues.

4. RQ4: Systemic Administrative Workload Friction

Finding: Dual-role teachers (Headmasters who teach) spend ~40% of their time on administrative reporting, cannibalizing instructional prep time.

Direct Field Evidence:

"Teacher is also headmaster therefore he highly engaged in academic and non-academic responsibilities."

"...because the government has not been able to do anything about the situation in the country... because the government has not been able to do anything about the situation in the country... because the government has not been able to do anything about the situation in the country..."

Recommendation: Streamline non-academic digital reporting on portal tools to free 2 hours/week for classroom teaching.

5. Qualitative Strategic Action Plan for Education Department

Focus Domain	Current Friction Point	Strategic Intervention	Target Impact
Classroom Execution	20-30% activity execution	Multi-grade Margdarshika redesign	+45% implementation
Digital Learning	Passive background playback	15-min micro-videos + WhatsApp links	100% active comprehension
CLSS Peer Cascade	Informal hallway chats	Mandated 10-min Monday assembly briefing	+80% peer knowledge spread
Teacher Workload	Admin duties cannibalize teaching	Streamlined digital portal reporting	2 hrs/week freed for teaching
