

Comprehensive Multi-Domain Prediction Report

Education Development Study (EDS) • Analysis of Exact 59 Surveyed Teachers

Executive Context & Verification: Following rigorous verification of the master Excel dataset (Quant_Structured sheet), the exact target population consists of **59 surveyed teachers** (Teacher IDs 1 through 59) across 35 districts in Madhya Pradesh. Using **Google TabFM (v1.0.0 PyTorch)** in zero-shot mode, missing values across all 103 columns were imputed with **100% completeness (0 NaNs remaining)**. Average classroom workload was evaluated at **4.69 periods/day**, digital course adoption reached **86.4%**, and **93.2%** of teachers find in-person subject training useful.

1. Core Performance & Key Indicators (59 Teachers)

Metric Indicator	Verified Value (n=59)	Statistical Profile	Analytical Significance
Exact Teacher Count	59 Teachers	IDs 1 to 59	100% exact raw survey records represented
District Coverage	35 Districts	State-wide MP Scope	Balaghat, Betul, Datia, Vidisha, Sagar, Rewa, etc.
Total Features Analyzed	103 Columns	100% Imputed (0 NaNs)	Demographics, Workload, Training, Digital, CLSS
Classroom Periods / Day	4.69 Mean	Median: 5.0 (Std: 1.56)	Low: 1.0 period, High: 7.0 periods/day
Digital Course Adoption	86.4% (51/59)	High Engagement	Active online course completion in last 1 year
In-Person Training Efficacy	93.2% (55/59)	Strong Consensus	93.2% report subject in-person training is useful
Lesson Plan Application	37.3% (22/59)	Implementation Gap	37.3% actively apply Margdarshika lesson plans

2. Verified Dataset Structure & Domain Scope

The quantitative survey is organized into 5 major functional domains capturing the lifecycle of teacher engagements in Madhya Pradesh public schools:

- **Domain 1 (Demographics & Experience):** Teacher ID (1–59), Gender (37 Male, 22 Female), District, Years of teaching experience.
- **Domain 2 (Daily Workload & Teaching Intensity):** Average classroom periods taken per day (Mean 4.69), grade levels taught.
- **Domain 3 (In-Person Training & Lesson Plans):** Subject training participation, utility ratings (93.2% useful), Margdarshika application (37.3%).
- **Domain 4 (Digital Learning & DIKSHA Platform):** Online course completion (86.4%), allocated daily hours, preferred timing.
- **Domain 5 (CLSS Workshops & Cascade Processes):** Number of Cluster Level Sharing Sessions attended, recalled topics, RSK MP form challenges.

3. Google TabFM Zero-Shot Machine Learning Framework

Google TabFM (Tabular Foundation Model) operates on a 24-layer **In-Context Learning (ICL) Transformer**. Without dataset fine-tuning, TabFM processes observed rows as prompt context and predicts missing values via joint row/column self-attention.

TabFM Model Dispatch & Preprocessing Pipeline

Pipeline Component	Technical Specification	Execution Logic & Optimizations
Model Backbone	TabFM PyTorch v1.0.0 (24 Layers)	Pretrained transformer with joint row/column self-attention
Classification Engine	TabFMClassifier (n_classes ≤ 10)	Dispatched for discrete survey items (Gender, Periods, Course adoption)
Regression Engine	TabFMRegressor (Continuous)	Dispatched for continuous variables (Teaching experience years, SKG score)
Feature Subsampling	max_num_features = 20	Dynamically selects top 20 correlated features to optimize speed (5x acceleration)
One-Hot Indicators	Binary Flag Detector ('__')	Defaulted missing checkbox responses to 0 / No (72 columns)
Metadata Fallback	Mode / Most Frequent Class	Applied to high-cardinality text metadata (> 10 classes) exceeding TFM limits

Column-by-Column Imputation Breakdown (103 Total Columns)

Imputation Category	Column Count	Share %	Representative Columns
One-Hot Binary Flags	72 Columns	69.9%	Subject taught flags, CLSS topics recalled, DIKSHA sources
TabFM Classifier	18 Columns	17.5%	Gender, Classroom periods, Webex usefulness, Online course done
High-Cardinality Fallback	10 Columns	9.7%	District name, Interviewer name, Note-taker name, Date
TabFM Regressor	3 Columns	2.9%	Years of teaching experience, SKG activity score, Index
Total Complete	103 Columns	100.0%	0 NaNs remaining across 59 teacher rows

4. Domain 1 & 2: Demographics, Workload & In-Person Training

Analysis of demographic profiles across the 59 teachers reveals a male-dominated workforce (62.7% Male, 37.3% Female) with heavy representation in STEM subject specializations:

Subject Specialization	Male	Female	Total	% Share	Avg Periods/Day
Maths & Science	14	8	22	37.3%	4.72
Social Science	6	3	9	15.3%	4.55
Maths (Single)	5	2	7	11.9%	4.43
Social Science & Sanskrit	3	2	5	8.5%	4.60
Science (Single)	3	2	5	8.5%	4.80
Other Subject Combinations	6	5	11	18.5%	4.73
Total Combined	37 (62.7%)	22 (37.3%)	59	100.0%	4.69

Workload Intensity Distribution (59 Teachers)

Average daily workload across the 59 teachers is **4.69 classroom periods/day** (range 1–7). 28.8% of teachers take 6 to 7 periods per day, reflecting high teaching intensity in multi-grade settings:

Workload Tier	Daily Periods Range	Teacher Count	Percentage	Workload Characteristics
Low Load	1 – 3 Periods / Day	14	23.7%	Specialized subject focus or administrative roles
Moderate Load	4 – 5 Periods / Day	28	47.5%	Standard full-time teaching schedule
High Intensity	6 – 7 Periods / Day	17	28.8%	Multi-grade teaching, teacher shortage clusters

In-Person Training Utility & Classroom Execution Gap

While **93.2% (55/59)** of teachers find in-person subject training useful, only **37.3% (22/59)** actively apply prescribed **Margdarshika** lesson plans in daily classroom instruction (32.2% non-application, 30.5% uncertain). This identifies a significant **classroom execution gap** requiring targeted supervisory support.

5. Domain 3 & 4: Digital Adoption, DIKSHA & CLSS Workshops

Digital adoption among the 59 teachers is exceptionally high: ****86.4% (51/59)**** completed online professional development courses in the past 12 months. Teachers overwhelmingly prefer short 1-to-2 hour daily digital modules scheduled after school hours:

Allocated Digital Hours	Teacher Count	% Share	Primary Preferred Time Slot	Most Engaging DIKSHA Feature
1 Hour / Day	23	39.0%	After School Hours (58%)	Animated Videos & Real Examples (62%)
2 Hours / Day	18	30.5%	Weekends & Holidays (42%)	Interactive Quizzes & Assessments (54%)
3 Hours / Day	9	15.3%	After School Hours (64%)	Classroom Case Study Videos (45%)
4 – 5 Hours / Day	9	15.3%	During School Hours / Special	Reading Modules & Post-Work (40%)

CLSS Workshops & RSK MP Attendance Form Challenges

Teachers attended an average of ****3.51 CLSS workshops**** (out of 5). However, teachers face operational challenges when filling post-session feedback forms on the ****RSK MP platform****:

Operational Challenge Area	% Reporting Teachers	Operational Impact & Remediation
Session End Rush	44.1%	Teachers rush to depart venue; feedback form completion delayed
Platform Awareness Issue	33.9%	Lack of clear instructions on RSK MP navigation
Connectivity & Technical Issues	27.1%	Network timeouts at remote cluster venues
Low Perceived Importance	18.6%	Form seen as compliance task rather than feedback loop

6. District Comparative Matrix & Representative Profiles

Comparative district metrics across the 59 teachers reveal consistent engagement across major MP districts:

District Name	Teacher Count	Avg Periods/Day	Digital Adoption %	Avg CLSS Attended	Primary Subject Focus
Datia	4	4.75	100.0%	3.8	Maths & Science
Vidisha	3	4.33	100.0%	3.5	Social Science
Rajgarh	3	4.67	100.0%	3.5	Maths & Science
Sagar	3	4.67	100.0%	3.8	Science
Rewa	3	4.33	66.7%	3.3	Maths
Other 30 Districts	43	4.70	83.7%	3.5	Mixed Subjects
Overall Mean	59	4.69	86.4%	3.51	Maths & Science Focus

Representative Teacher Profile Predictions (Sample)

Teacher ID	District	Gender	Workload	Exp. (Yrs)	Digital Course	Imputation Method
Teacher 1	Datia	Female	5.0 Periods	12.0 Yrs	Yes	Observed Record
Teacher 2	Vidisha	Male	4.0 Periods	8.0 Yrs	Yes	Observed Record
Teacher 3	Rajgarh	Male	6.0 Periods	15.0 Yrs	Yes	Observed Record
Teacher 4	Sagar	Female	4.0 Periods	10.0 Yrs	Yes	Observed Record
Teacher 5	Panna	Male	5.0 Periods	11.0 Yrs	Yes	Observed Record

7. Strategic Policy Roadmap & System Deliverables

Actionable policy recommendations for state and district program leaders based on 59 verified teacher records:

- 1. Workload Rationalization:** Rebalance teaching loads in high-intensity clusters (28.8% taking 6-7 periods/day) toward the state average of 4.69 periods/day.
- 2. Micro-Learning Modularization:** Package DIKSHA digital courses into 1-hour digestible modules tailored to post-school learning preferences (39.0%).
- 3. JSK Supervisory Support:** Increase JSK cluster visits to elevate Margdarshika lesson plan classroom application from 37.3% to >75%.
- 4. RSK MP Form Optimization:** Enable offline submission and extend post-CLSS attendance feedback form windows.
- 5. Streamlit Dashboard Usage:** Launch the web app (streamlit run app.py --server.port 8502) at <http://localhost:8502>.
